|| The World || Show Leadership Do Leadership Be Leadership || United States Will Provide an Initial \$02 Billion With Further \$02 Billion Contributions Towards COVAX: COVID Has Shown Us That No Nation Can Act Alone in the Face of a Pandemic: President Biden Calls on G-7 Partners to Prioritise a Sustainable Health Security Financing Mechanism Aimed at Catalysing Countries to Build the Needed Capacity to End This Pandemic and Prevent the Next One ||

|| Thursday: February 18: 2021 || α. As the corona virus continues to spread throughout the world and with new variants emerging, the facts are clear that it is critical that we vaccinate as many people as possible, as quickly as possible. Tomorrow at the G7, the US President Mr Joe Biden will announce that he is taking concrete steps to improve the health and the safety of Americans by protecting vulnerable populations worldwide. He will, also, call on G-7 partners to prioritise a sustainable health security financing mechanism, aimed at catalysing countries to build the needed capacity to end this pandemic and prevent the next one.

COVID has shown us that no nation can act alone in the face of a pandemic. Today, President Biden is taking action to support the world's most vulnerable and protect Americans from COVID-19. Using money appropriated by a bipartisan Congressional vote in December 2020, the United States will provide an initial \$02 billion contribution to Gavi, the Vaccine Alliance for the COVAX Advance Market Commitment, the innovative financing instrument of the COVAX Facility, which supports access to safe and effective vaccines for 92 economies with low and middle incomes. G-7 times \$04 Billion equate to \$28 Billion! And, that would be just the beginning for there are many other nations, who are capable of following suit. Let the world see whether the G-7 nations, as well as, others, do have the will to fathom the moral gravitas of what humanity faces today in these desperate times. That what is done as moral imperative is not 'charity'; no one is asking for charity. It is a duty for we do it because we can not do otherwise because we are humanity, which means that we are and can not but exist in, by and with 'compassion', that drives us towards action and because we have empathy, which creates the pathway for us to reach that compassion, that drives us up, faces us up to the choice, that must we make and that choice faces us to that action, that must we take.

The United States will, also, take a leadership role in galvanising further global contributions to COVAX by releasing an additional \$02 billion through 2021 and 2022, of which the first \$500 million will be made available when existing donor pledges are fulfilled and initial doses are delivered to AMC countries. In close co-operation with Gavi, this additional \$02 billion in funding will serve to expand COVAX's reach. The US, also, calls on its G-7 and other partners to work alongside Gavi, to bring in billions more in resources to support global COVID-19 vaccination and to target urgent vaccine manufacturing, supply and delivery needs.

Finally, at the G-7 Mr Biden will reaffirm the US. commitment to global health security and advancing the Global Health Security Agenda. All countries should have the capability to prevent, detect and respond to outbreaks. The COVID-19 pandemic and on-going outbreaks of Ebola in the Democratic Republic of the Congo and Guinea highlight the need for sustainable health security financing to catalyse country capacity to prevent biological catastrophes.

The White House has further announced that the Biden Administration will:

Protect the most vulnerable, protecting America: The United States' contribution is designated to help Gavi prevent, prepare for and respond to coronavirus through vaccine procurement and

delivery for the world’s most vulnerable. In partnership with Gavi, the bulk of these funds will be targeted to support direct vaccine procurement and a portion will, also, support broader country readiness and vaccine service delivery.

Encourage the global community to action: Under President Mr Biden, the United States will take a leadership role in galvanising new donor commitments toward the COVAX Facility. The next \$02 billion of support from the US government, which will be additional to today’s initial \$02 billion contribution, will be released as the other donors elevate pledge commitments. The goal is clear: vaccinate vulnerable populations and reach those without other options. This funding from the Administration will enable Gavi to address urgent needs, while, also, supporting efforts to diversify and increase contributions from other donors in 2021.

|| Asia || Five Million Yemenis are One Step Away From Famine: The Security Council Told ||

|| Thursday: February 18: 2021 || á. “Malnutrition rates in Yemen are at record highs as the country is speeding towards the worst famine the world has seen in decades.” the UN Emergency Relief Co-ordinator told the Security Council on Thursday, citing newly released data.

“We are running out of time.” said Mr Mark Lowcock, who, also, heads the UN Humanitarian Affairs. He noted that across Yemen, more than 16 million people are going hungry, five million of whom are just one step away from famine.

He painted a picture of children starving to death, with distended bellies, emaciated limbs and blank stares, pointing to some 400,000 under-five girls and boys, who are so severely malnourished that they are in their last weeks and months. Over fears of the devastating impact it could have on Yemen’s food supply, last week the United States reversed its designation of Ansar Allah as a foreign terrorist organisation.

“US officials have made clear and we agree, that the concerns around this issue are strictly humanitarian.” said Mr Lowcock, adding that the US, also, reaffirmed its intention to prioritise diplomacy in ending the war and dealing with the humanitarian crisis. He warned that, if, Yemen tips into a massive famine, an opportunity towards lasting peace would be lost.

To prevent a further catastrophe, the Humanitarian Co-ordinator called for urgent action on five points, beginning with the protection of civilians. As front lines reportedly move closer to civilian areas, with attacks sparking a dangerous escalation, Mr Lowcock worried that hundreds of thousands of people might again be sent running for their lives at a time when everyone should be doing everything possible to stop famine.

On his second point, humanitarian access, he reminded that international humanitarian law required ‘rapid, unimpeded humanitarian access’ and emphasised that despite many challenges, aid operations were still delivering. Turning to funding, his third point, he said that in 2020, aid operation received half of what it had the previous year, which resulted in millions of people in need.

He informed the Council that on March 01, the Secretary-General will convene a virtual high-level pledging event for the Yemen crisis. He called on everyone to show they are serious about seizing the opportunity for peace. On the fourth issue, supporting the economy, he advised, among other things, to bring the exchange rate down to more sustainable levels.

And on his final point, making progress towards peace, Mr Lowcock stressed that first, the violence must stop and called for a mediated nationwide ceasefire and the resumption of the political process. “The only way to end the crisis in Yemen is to end the war.”

While fresh violence and a worsening humanitarian situation continues to unfold, Special Envoy Mr Martin Griffiths said that the situation had taken a sharp escalatory turn with Ansar Allah’s most recent offensive on Marib Governorate. Reiterating calls that the attack on Marib must stop, because it put millions of civilians at risk, especially, with the fighting reaching camps for internally displaced persons, he upheld that forceful quests for territorial gain threatened peace prospects as looming famine, fuel shortages and other grave challenges prevail.

Although, the situation on the ground is deteriorating, Mr Griffiths welcomed the US’ renewed focus on the conflict, saying the move offers a new opportunity to reopen space for a negotiated solution and that revived international momentum was indispensable to finding a peaceful resolution.

He highlighted elements for a mutually acceptable end to the war and a path towards peace, that included political participation, accountable governance, equal citizenship and economic justice. “The only way to realise these aspirations is through a genuinely inclusive, Yemeni-led political process under United Nations auspices and supported by the international community.” he said.

Emphasising what is at stake, Mr Griffiths said that the military situation was extremely tense and underscored that civilians were bearing the brunt of shocking violations of international humanitarian law, worrying spikes of violence and continuing hostilities in Hudaydah and Taïz Governorates, as well as, cross-border attacks.

However, recalling that the parties had successfully negotiated a large-scale release of prisoners and detainees in 2020, he maintained that the negotiating table could produce win-win results. The UN official informed the Council that negotiations for more releases were underway.

He, also, called for the immediate and unconditional release of all sick, wounded, elderly and children detainees, as well as, all arbitrarily detained civilians, including, women and journalists. “As a mediator, I seek common grounds for agreements. But there is nothing anybody can do to force the warring parties into peace unless they choose to put down the guns and talk to each other. The responsibility to end the war, first and foremost, lies with the parties to the conflict. I hope they will not miss this chance.”

|| The World || The World Health Organisation Seeks \$01.96 Billion For 2021 Strategic Plan for COVID-19 Response For the World ||

|| Thursday: February 18: 2021 || α. The World Health Organisation:WHO is seeking nearly \$02 billion to fund its 2021 Strategic Preparedness and Response Plan:SPRP for COVID-19 response, which was launched on Thursday in Geneva. The Strategy follows the initial plan last year, that outlined the path countries should take to suppress transmission of the new coronavirus. The 2021 Plan will have six objectives: suppressing transmission, reducing exposure, countering misinformation and disinformation, protecting vulnerable people, reducing death and illness and accelerating equitable access to new tools against COVID-19, such as, vaccines, diagnostics and therapeutics.

“Fully funding the SPRP is not just an investment in responding to COVID-19, it’s an investment in the global recovery and in building the architecture to prepare for, prevent and mitigate future health emergencies.” said WHO Director-General Dr Tedros Adhanom Ghebreyesus, speaking during his routine press conference. WHO is looking to raise \$01.96 billion to fund the SPRP. Dr

Tedros said \$01.2 billion will go to the Agency's component of the Access to COVID-19 Tools:ACT Accelerator, a landmark global collaboration to make these medicines accessible to people everywhere.

Another \$643 million will go towards supporting people, who require humanitarian assistance due to conflict, insecurity or other crises. Dr Tedros, also, provided details about the first SPRP, which raised \$01.58 million. Some 90% of the funding was allocated to countries and regions, supporting those on the frontlines of the pandemic.

"It, also, enabled WHO and our partners to ship millions of tests and items of personal protective equipment, and to support thousands of ICU beds around the world." Dr Tedros said. The funding was, also, used to deploy some 191 Emergency Medical Teams, support sero-epidemiological studies in 58 countries and provide online training, that reached nearly five million people.

Dr Tedros, also, announced that WHO would launch a new declaration on Friday focused on the equitable distribution of COVID-19 vaccines, which calls for action from several groups, such as, political leaders, manufacturers and governments.

"Vaccine equity is, especially, important for fragile and vulnerable groups and for small island states like those in the Pacific and Caribbean with small populations, who can miss out on vaccines because they have less bargaining power than big countries." he said. He stressed that no country should be left behind.

|| Geo-Politics || Loss of Autonomy in India-Administered Jammu and Kashmir Threatens Minorities' Rights ||

The University of Southampton Indian Dance Society: making a Dance-Cricketing-Debut, at the recent cricket match between England and India at the City's Ageas Bowl: Image: University of Southampton: The Humanion: September 12:2018

|| Thursday: February 18: 2021 || α. India's decision to end autonomy in Jammu and Kashmir and restrict the participation of minorities in political and other activities sparked the concern of two UN-appointed independent human rights experts, on Thursday. As Jammu and Kashmir was India's only Muslim-majority state, the Country granted them partial autonomy out of respect for the ethnic, linguistic and religious identities of its people.

On August 05, 2019, the Indian Government unilaterally revoked the special status of Jammu and Kashmir and in May 2020, passed the so-called Domicile Rules, which removed protections for those in the territory. The new laws override previous ones, that had granted the Kashmiri Muslim, Dogri, Gojri, Pahari, Sikh, Ladhaki and other established minorities the right to buy property, own land and access certain state jobs.

"The loss of autonomy and the imposition of direct rule by the Government in New Delhi suggests the people of Jammu and Kashmir no longer have their own government and have lost power to legislate or amend laws in the region to ensure the protection of their rights as minorities." Mr

Fernand de Varennes, Special Rapporteur on minority issues and Mr Ahmed Shaheed, Special Rapporteur on freedom of religion or belief, said in a statement.

“These legislative changes may have the potential to pave the way for people from outside the former state of Jammu and Kashmir to settle in the region, alter the demographics of the region and undermine the minorities’ ability to exercise effectively their human rights.” they said.

Moreover, the number of successful applicants for domicile certificates, that appear to be from outside Jammu and Kashmir raised their concern that demographic changes on a linguistic, religious and ethnic basis have already begun. The UN experts urged India to ensure the economic, social and cultural rights of the people in Jammu and Kashmir along with their rights to freedom of expression and participation in matters affecting them.

Independent UN Special Rapporteurs are appointed by the Human Rights Council. They are not UN staff and do not receive a salary for their work. They are independent from any government or organization and serve in their individual capacity.

|| The Sunnara || Following 203 Days of Travelling 293 Million Miles From Earth Here I Touchdown to Announce: Humankind to Follow Soon: NASA's Mars Perseverance Rover Safely Lands on the Red Planet ||

|| Thursday: February 18: 2021 || α. The largest, most advanced rover NASA has sent to another world has touched down on Mars today, Thursday, February 18, after a 203-day journey, traversing 293 million miles or 472 million kilometres. Confirmation of the successful touchdown was announced in mission control at NASA's Jet Propulsion Laboratory in Southern California at 15:55 EST or 12:55 PST. "The mission itself personifies the human ideal of persevering toward the future and will help us prepare for human exploration of the Red Planet." said Mr Steve Jurczyk, the Acting NASA Administrator.

Packed with ground-breaking technology, the Mars 2020 mission, launched on July 30, 2020, from Cape Canaveral Space Force Station in Florida. The Perseverance rover mission marks an ambitious first step in the effort to collect Mars samples and return them to Earth. "This landing is one of those pivotal moments for NASA, the United States and space exploration globally, when we know, we are on the cusp of discovery and sharpening our pencils, so to speak, to rewrite the textbooks." said the Acting NASA Administrator Mr Steve Jurczyk. "The Mars 2020 Perseverance mission embodies our nation's spirit of persevering, even, in the most challenging of situations, inspiring and advancing science and exploration."

About the size of a car, the 2,263-pound, 1,026-kilogram, robotic geologist and astrobiologist will undergo several weeks of testing before it begins its two-year science investigation of Mars' Jezero Crater. While the rover will investigate the rock and sediment of Jezero's ancient lakebed and river delta to characterise the region's geology and past climate, a fundamental part of its mission is astrobiology, including, the search for signs of ancient microbial life.

To that end, the Mars Sample Return campaign, being planned by NASA and the European Space Agency:ESA, will allow scientists on Earth to study samples, collected by Perseverance to search for definitive signs of past life, using instruments too large and complex to send to the Red Planet.

“Because of today’s exciting events, the first pristine samples from carefully documented locations on another planet are another step closer to being returned to Earth.” said Mr Thomas Zurbuchen, The Associate Administrator for Science at NASA. “Perseverance is the first step in bringing back rock and regolith from Mars. We don’t know what these pristine samples from Mars will tell us. But what they could tell us is monumental, including, that life might have once existed beyond Earth.”

Some 28 miles, 45 kilometres wide, Jezero Crater sits on the western edge of Isidis Planitia, a giant impact basin, just north of the Martian equator. Scientists have determined that 03.5 billion years ago the crater had its own river delta and was filled with water. The power system, that provides electricity and heat for Perseverance through its exploration of Jezero Crater is a Multi-Mission Radioisotope Thermoelectric Generator:MMRTG. The US. Department of Energy:DOE provided it to NASA through an on-going partnership to develop power systems for civil space applications.

Equipped with seven primary science instruments, the most cameras ever sent to Mars and its exquisitely complex sample caching system, the first of its kind, sent into space, Perseverance will scour the Jezero region for fossilised remains of ancient microscopic Martian life, taking samples along the way.

“Perseverance is the most sophisticated robotic geologist ever made but, verifying that microscopic life once existed carries an enormous burden of proof.” said Mr Lori Glaze, the Director of NASA’s Planetary Science Division. “While we’ll learn a lot with the great instrument we have aboard the rover, it may very well require the far more capable laboratories and instruments back here on Earth to tell us whether our samples carry evidence that Mars once harboured life.”

“Landing on Mars is always an incredibly difficult task and we are proud to continue building on our past success.” said JPL Director Mr Michael Watkins. “But, while Perseverance advances that success, this rover is, also, blazing its own path and daring new challenges in the surface mission. We built the rover not just to land but to find and collect the best scientific samples for return to Earth and its incredibly complex sampling system and autonomy not only enable that mission, they set the stage for future robotic and crewed missions.”

The Mars Entry, Descent and Landing Instrumentation 2:MEDLI2 sensor suite collected data about Mars’ atmosphere during entry and the Terrain-Relative Navigation system automatically guided the spacecraft during final descent. The data from both are expected to help future human missions land on other worlds more safely and with larger payloads.

On the surface of Mars, Perseverance’s science instruments will have an opportunity to scientifically shine. Mastcam-Z is a pair of zoomable science cameras on Perseverance’s remote

sensing mast or head, that creates high-resolution, colour three-D panoramas of the Martian landscape. Also, located on the mast, the SuperCam, that uses a pulsed laser to study the chemistry of rocks and sediment and has its own microphone to help scientists better understand the property of the rocks, including, their hardness.

Located on a turret at the end of the rover's robotic arm, the Planetary Instrument for X-ray Lithochemistry:PIXL and the Scanning Habitable Environments with Raman and Luminescence for Organics and Chemicals:SHERLOC instruments will work together to collect data on Mars' geology close-up. PIXL will use an X-ray beam and suite of sensors to delve into a rock's elemental chemistry. SHERLOC's ultraviolet laser and spectrometer, along with its Wide Angle Topographic Sensor for Operations and eNginneering:WATSON imager, will study rock surfaces, mapping out the presence of certain minerals and organic molecules, which are the carbon-based building blocks of life on Earth.

The rover chassis is home to three science instruments, as well. The Radar Imager for Mars' Subsurface Experiment:RIMFAX is the first ground-penetrating radar on the surface of Mars and will be used to determine how different layers of the Martian surface formed over time. The data could help pave the way for future sensors, that hunt for subsurface water ice deposits.

Also, with an eye on future Red Planet explorations, the Mars Oxygen In-Situ Resource Utilisation Experiment:MOXIE technology demonstration will attempt to manufacture oxygen out of thin air, the Red Planet's tenuous and, mostly, carbon dioxide atmosphere. The rover's Mars Environmental Dynamics Analyser:MEDA instrument, which has sensors on the mast and chassis, will provide key information about present-day Mars weather, climate and dust.

Currently attached to the belly of Perseverance, the diminutive Ingenuity Mars Helicopter is a technology demonstration, that will attempt the first powered, controlled flight on another planet. Project engineers and scientists will now put Perseverance through its paces, testing every instrument, sub-system and sub-routine over the next month or two. Only, then, will they deploy the helicopter to the surface for the flight test phase. If, successful, Ingenuity could add an aerial dimension to exploration of the Red Planet in which such helicopters serve as a scouts or make deliveries for future astronauts away from their base.

Once Ingenuity's test flights are complete, the rover's search for evidence of ancient microbial life will begin in earnest. "Perseverance is more than a rover and more than this amazing collection of men and women, that built it and got us here." said Mr John McNamee, the Project Manager of the Mars 2020 Perseverance rover mission at JPL. "It is, even, more than the 10.9 million people, who signed up to be part of our mission. This mission is about what humans can achieve when they persevere. We made it this far. Now, watch us go."

A primary objective for Perseverance's mission on Mars is astrobiology research, including, the search for signs of ancient microbial life. The rover will characterise the planet's geology and past climate and be the first mission to collect and cache Martian rock and regolith, paving the way for human exploration of the Red Planet.

Subsequent NASA missions, in co-operation with ESA, will send spacecraft to Mars to collect these cached samples from the surface and return them to Earth for in-depth analysis. The Mars 2020 Perseverance mission is part of NASA's Moon to Mars exploration approach, which includes Artemis missions to the Moon, that will help prepare for human exploration of the Red Planet.

JPL, a division of Caltech in Pasadena, California, manages the Mars 2020 Perseverance mission and the Ingenuity Mars Helicopter technology demonstration for NASA.

What Are Building-Block Foundational Human Rights

Ask Your Political Leaders About Building-Block Foundational Human Rights and Ask Them About Humanics

The Building-Block Foundational Human Rights

- A: Absolute Right to Live in Clean, Healthy, Safe and Natural Environment
- B: Absolute Right to Breathe Natural, Fresh, Clean and Safe Air
- C: Absolute Right to Necessary Nutritional Balanced Food and Drink
- D: Absolute Right to Free Medical Care at the Point of Need
- E: Absolute Right to an Absolute Home
- F: Absolute Right to Free Degree-Level Education and Life Long Learning
- G: Absolute Right to Guaranteed Social Care
- H: Absolute Right to a Universal Income
- I: Absolute Right to a Job
- J: Absolute Right to Dignified Civic and Human Funeral Paid Through by Universal Income

This Is the Body of Work, by Munayem Mayenin, That Has Brought Into Existence the Philosophy and Vision of Humanics

Dehumanisation of Humanity: Volume One: Published: July: 2007: 978-1-4477-1330-2

Mayenin worked and developed the very critique of capitalism and Marxism while at university in which he had envisioned the world's future in humanics for humanity to reach and achieve liberty and equality for all humanity, which capitalism has continually slaughtered and Marxism failed desperately, even, to understand, let alone, to know or show how to seek and achieve them. Some of these works were published in publications in the early 00s and the volume was published as a book in 2007. There are three other volumes of this planned work, yet to be published.

Humanics The Foundation: Volume One: Published: December 06: 2017: ISBN: 978-0-244-34575-4

This piece of work elaborated the philosophy of humanics and presented the idea of human enterprise and how it works to enable humanity to conduct the human economical endeavours in humanics.

Humanics The Humanicsonomics: Volume Two: Published: June 12: 2018: ISBN: 978-0-244-48334-0

This is the political economics or humanicsonomics of humanics in human enterprise. This volume presents the political economics of humanics and envisioned world's future as two distinct phases: pre-humanical or Kapitalawnomics phase in which capitalism is saved from pseudonomics and brought under the absolute and complete control and power of the rule of law so to make it serve the people at all times and not the rich and through this phase, humanity brings into existence the humanical Building-Block Foundational Human Rights and end capitalism's Poverty Paradigm, that causes all of the high-cruelties, high-brutalities and high-barbarities, that are inflicted on the vast number of humanity on this earth. Further to this, this work advances the system and mechanism of human enterprise and envisioned at the end of the development of Kapitalawnomics human societies will have developed enough to be able and equipped to try and seek to bring into existence humanical societies, that will begin to form a grid of humanical societies into a universal humanical civilisation on earth.

The Humanics Elleesium Declaration 2019: The Humanicsxian Manifesto: Published: April 06: 2019: ISBN: 978-0-244-76474-6

This short piece of work nano-summarised the entire body of Munayem Mayenin's works on humanics. This calls on the working humanity of the world to rise, organise and united under new and humanical political forces, parties and organisations to seek and try to bring about a humanical world movement to lead humanity to equality and liberty.

Humanics The Humanicsovics: Volume Three: To Be Published Later This Year

This volume presents the political philosophy of humanics and the means to deliver that political philosophy by and through humanicsovics, humanical direct form of democracy without party politics whereby each and every individual human being becomes his:her own High Representative and they all run their society's human affairs management together as individuals, working together as scientists and mathematicians without any political parties.

Alphansum Sovereign Necessarius: Published April 14: 2020: ISBN: 978-0-244-58241-8

Although, this large volume is of metaphysical work, it has brought the whole humanical universal view in a harmonious outlook, unifying all expressions, fields, areas and arenas of human existence and in this process this work elvioned the coming into existence the new branches of science, that has already been mentioned.

Laranska The Anatomy of Fear: Novel: Published: January 2009: ISBN: 978-1-4477-1426-2

No Man's Land's Bloom: Play: Published: May 2010: ISBN: 978-1-4477-0903-9

United Colours of Blood: Screenplay: Published: January 2009: ISBN: 978-1-4477-1615-0

Larantia Poetry of Anatophysiophilosophicamonimayareginata: A Magnum of a Planned Volume of 850 Sonnets About All Branches of Medicine: Currently Having Few Hundred Sonnets: First Published: October 14, 2016: ISBN: 978-1-326-28882-2

In his other major bodies of works, that are yet to be published Mayenin has worked on further in elaborating the psychology and social psychology of the zoohumanity, that capitalism and all the dehumanisations it has inflicted on humanity through its enforcement of inequality and the absence of liberty. These as yet unpublished works include: Psychology of Zoohuman, Humanical Jurisprudence, Sociology of Evil, Economics of Squalors: The High-Cruelties High-Brutalities and High-Barbarities of Capitalism, Humanical Moral Science, Social Morality Or Good State, Humanical Civilisation: A Universal Grid of Humanical Societies and Colossus Complexus: Eternally Learning Humanity.

|| Humanity Will Continue to Live an Inferior Life Than What is Possible Until the Two Halves, Women and Men, with All Individuals in Them, are Absolutely, Fundamentally and Jubilantly Equal at Liberty. Humanity, Therefore, Is Not and Can Not Be Free Until All Humans are Equals for Only by the Yardstick of This Equality Their State of Being Free Can Be Measured. In Other Words, There Can Not Exist Liberty Unless There Exists Equality Between and Among All Humans and This State of Equality Can Not Come to Exist So Long There Remain Two Groups of Humans: The Powerful and The Powerless: Whereby the Former Controls the Later and Creates, Maintains and Carries Forward the Perpetual State of Inequality: Economically, Politically, Judicially, Constitutionally, Socially, Culturally and Spiritually. To Reach the State of Equality and Liberty, the Task Before Humanity is, Therefore, to Change This State by Taking Away Ownership and

Money and, with Them, the Power They Generate and Confer, That Lets One Small Group of Humans, The Powerfulls, Subjugating the Vast Multitude of Humans, The Powerless, Under Their Dictatorship. For Only by Taking Away 'the Gun' of the Power of the Powerfulls, Humanity Can Bring About the State of Liberty, as Well as, Equality at Once: Equality and Liberty Can Not and Do Not Exist Separately But Together and Simultaneously. Equality and Liberty Exist as The Promethumean Fire: In Which There is the Light and There is the Heat in One Flame: The Humanion Stands Here on the Path of Humanics: A State of Liberty for All Humanity at Equality. The Promethumean: Where Prometheus is Not Seen as a Man But a Human: In Short, Regine Humanics Foundation Ltd and The Humanion Stand for These and Exist and Work for the Promotion of This Vision of Humanics for a Better Human Condition for All Humanity Across the Mother Earth on the Mother Universana: We Invite You All for Your Support: Join Us in Telling the World and World Humanity That: An Infinitely Better Human Condition for All Humanity Across the Mother Earth IS Possible. || Regine Humanics Foundation Ltd ||

Regine Humanics Foundation Ltd Publishes The Humanion, The Humanion Portable Daily and The Humanion Larnaarch, among doing other things: We do not and shall not accept fundings or contributions from any type, form, manner and layer of Governments of national, international, supra-national or any other type or bodies formed by them nor from rich individuals or bodies or agencies of any kind. This, to us, is as a matter of absolute philosophic principle to ensure our resolute and complete independence.

The ways, in which, we invite support from the readers, members of the public and all other individuals and agencies and businesses of any kind, are: a: Voluntary Subscription Payments: b: Voluntary Contributions: c: The Minimal and Symbolic Membership Fees to Our Regineumanics Family: d: Buying a Copy of The Long Walk to Humanics: e: Contributing to Our Events: f: Subscribing to Our Publications and g: Advertisement in The Humanion Group of Publications.

You make a conscious, wilful and philosophic choice to Support The Regine Group of Publications and The Foundation. If, you do: thank you: If, you do not, thank you, too, for reading The Humanion and The Humanion Portable Daily.

The world has, apparently, accepted that Capitalism is the High Pinnacle of All Systems and, some still dream that Marxism will rescue humanity from this Killing Mechanism Capitalism, we refuse to subscribe to that. Humanics is the Post-Marxist and Post-Capitalistic World View of What Humanity can be and what it can do and how infinitely better a human condition can be created in a Humanical Society, by eradicating ownership and money and by establishing belongingship in

human enterprise, setting all humans at liberty and equality under the rule of law in natural justice with a direct form of democracy, humanics calls it, Humanicsovics, in which, each human soul is her:his own High Representative. In this, Humanics is the Minority Vision and we do not and can not expect millions and billions of people supporting our vision today but We Whole-Heartedly Believe That ONE DAY This Humanity Shall BE ALL HUMANICAL: By When: We Know Not But This: That Being a Monstrous Killing Mechanism Capitalism IS Unsustainable: The World Shall Change One Day and Every Change Begins with an Idea, with a Vision:

We invite you to Envision the Vision and Philosophy of Humanics and Support The Humanion, The Humanion Portable Daily, The Humanion Larnaarch and The Foundation to Keep Taking Forward the Vision and Philosophy of Humanics, to Keep on Challenging Capitalism's Poverty Paradigm, for an Infinitely Better Humanity in an Infinitely Better Human Condition for All Humanity Across Mother Earth. Thank You.

The Humanion UK Online Daily: Free Online Everyday: In Publication Since September 24: 2015

There can not be any sustainability until and unless we take the view that sustainability comes as philosophical, political philosophical, political economical, ethical, moral, sociological, educational, jurisprudential, socio-cultural and ecological and humanical spiritual so that we are able to create a sustainable 'architecture' of existence in a clean, green, circular and sustainable political economics, that underpins all forms and expressions of sustainability and when such an 'architecture' exists within the Larin Paraske Maxim or Oath: Do No Harm to Anyone or Anything: all things and all living forms must have equitable status in the sphere of all existence or all life on earth, with an emphasis on the Universana. Because humanity does not just exist on earth but it does so in the Sunnara, in the Home Bay of the Milky Way Galaxy in the vast expanse of the Universe, our home Universana. Dear Reader, we are on the path of humanics, please, tell the world and world humanity that humanics has arrived on earth from 'the without of human imagination', learning, questioning and thoughts, gained from the eternal walks of this human soul's eternal journey on the eternal path of eternal learning, with its humanical metaphysics, humanical philosophy as natural science, humanical psychology, humanical political philosophy, humanical political economics, humanical jurisprudence, humanical sociology, humanical moral science and humanical arealism. For capitalism has created global warming and climate change and wracked the earth with environmental degradations and pollutions in all spheres, where bio-diversity is getting lost at an alarming rate as the earth keeps on being heated up. Humanity is devastated by capitalism's poverty-paradigm, delivering all its high-cruelties, high-brutalities and high-barbarities. This is why it is paramount that that we speak up and out and try our hardest to inspire faith, hope, determination and resolution among all humanity of this world, women and men, that

we shall not just accept this 'sentence of doom', that capitalism's mindless consumerism, infinite greed of infinite profiteering, decadent voguism and venomous voyeurism, orchestrated by the Distorteddia have brought us and, yet, that we can, we should, we ought, we must keep on trying: 'to seek to try: to do: to change: to make better the human condition' and we do so as one humanity, as women and men, working together as one, in unison with the same aim, same goal, same objective: to get all humanity to liberty, equality, fairness and justice in the rule of law in natural justice, with a purpose and meaning to our existence, where we all humanity, with our all-unity and all-diversity, exist as one humanity naturale on one Mother Earth, in one Sunnara, in one Home Bay Milky Way Galaxy in the one Universana with the humanical foundation of faith: humanity is an infinity unfolding itself, in which, we are all-for-one and one-for-all.
