|| The World || Finland's Calling the World Towards Gender Equality: Who Should Receive the Next International Gender Equality Prize: Nominate Your Candidate by May 16 ||

Humanics: The Larin Paraske Maxim Or Oath: Do No Harm to Anyone Or Anything

Larin Paraske: December 27: 1833-January 03: 1904: Painting By Albert Edelfelt: Larin Paraske Sings Requiems

|| Thursday: March 11: 2021 || á. The Finnish Government launched the International Gender Equality Prize:IGEP in 2017 as part of the nation's centenary celebrations of independence. The Prize is awarded biennially. This is year the third International Gender Equality Prize will be awarded at the end of 2021. The Prize is now open for nominations for the next recipient. Anyone and everyone can submit a proposal. We invite the Finland Government to Name This Prize Larin Paraske International Gender Equality Prize, which will be fitting to honour one of Finland's foundational names, many of whom are women, such as Minna Canth, being another profound figure.

The nomination of candidates for this year's Prize must be made by May 16, 2021, using the form provided in English, at the IGEP website <https://igep.fi>. The Prize will be awarded to a person or actor, who has promoted gender equality in a globally significant way. The Prize amounts to EUR 300,000, which the recipient will assign to a cause, that strengthens gender equality. "Finland is a frontrunner in the promotion of gender equality and one of the leading countries when it comes to advancing equality. It is of vital importance to be consistent in our on-going work to strengthen gender equality.

With this Prize, we want to advance international discussion on equality matters and to show how Finland has managed to create sustainable wellbeing and strengthen democracy." says Finland's Minister for Equality Affairs, Mr Thomas Blomqvist.

The winner of the prize will be selected by a jury of international experts. In 2021, the members of the international jury are Ms Eva Biaudet, Member of the Finnish Parliament and the Chair of the jury; Ms Melanne Verbeke, former US Ambassador for Global Women's Issues and Executive Director of the Georgetown Institute for Women, Peace and Security at Georgetown University; Mr Dean Peacock, the Director of the Women's International League for Peace and Freedom's initiative to confront militarised masculinities; Mr Matti Vanhanen, the Minister of Finance of Finland and Ms Bella Forsgrén, Member of the Finnish Parliament.

The first Prize was awarded to Federal Chancellor of Germany Angela Merkel, whose life's work has made her one of the world's most influential people and an example to many women and girls. Merkel granted the Prize money to SOS Femmes et Enfants Victimes de Violence Familiale, a Nigerien civil society organisation that used it to build a residential shelter for victims of domestic violence in the Nigerien capital of Niamey.

In 2019, the Prize was awarded to Equality Now, an organisation with a history of 27 years of globally effective work to defend the rights of women. The organisation aims, among other things, to change gendered norms both nationally and internationally and to change discriminating laws and practices.

“We hope to receive a multitude of diverse nominations for the next winner of the International Gender Equality Prize. Due to the international reach of the prize, we expect to receive nominations from all around the world.” says Mr Blomqvist.

Anyone can nominate a candidate for the prize until 16 May 16, 2021 using the form in English, available on the IGEP website at <https://igep.fi>

The award ceremony will be organised in co-operation with the City of Tampere and held at Tampere Hall.

**|| The Coronavirus Has Already Killed More Than 2,500,000 People: How Many More Millions This World Is Ready to Let Killed by Keeping the Vaccine Away From the Poor Countries: United Nations Launches Only Together to Support Global Vaccine Equity: COVAX Is Still Short of \$02 Billion ||**

|| Thursday: March 11: 2021 || á. The United Nations on launched a new global campaign, Only Together, today, aiming to advance fair and equitable access to COVID-19 vaccines worldwide. The initiative underscores the need for global solidarity to ensure vaccines are accessible in all countries, initially, targeting healthcare workers and the most vulnerable. “The virus has killed more than

02.5 million people and left millions more with debilitating long-term health effects, the UN Secretary-General Mr Antonio Guterres said in a video message to launch the campaign.

Expressing concern over a small number of rich countries are rolling out a majority of the doses, Mr Guterres emphasised that COVID-19 vaccines must be considered a global public good. By the end of 2021, COVAX aims to offer vaccines to about a third of each participating country's population. But that progress pales in comparison to the 10 richest countries, which possess nearly 80% of all COVID-19 vaccines, with some planning to vaccinate their entire population within the next few months.

"Over the past year, we've all missed out on doing the things we love to do with others: eating, hugging and going to school and work." said the UN Deputy Secretary-General Ms Amina J Mohammed. "Millions of us have lost someone we love or had our livelihoods taken away."

With the biggest vaccine roll out in history now underway, millions of doses are being delivered across the globe, including, to some of the world's poorest countries, through the efforts of COVAX, the UN-led global vaccine equity mechanism. The COVID-19 vaccines will stop people from dying, prevent new variants from emerging, reignite economies and offer the best hope to end the pandemic.

Also, highlighting that an unprecedented global scientific effort for vaccines has given us hope to defeat the virus, Ms Mohammed stressed that new momentum and hope would emerge 'only, if, we work together to ensure everyone, everywhere has access to COVID-19 vaccines. Only together can we end the pandemic and transform a new era of hope'.

"No country can overcome this crisis in isolation." said Mr Guterres said. He urged governments and businesses to share doses and technology, so supply goes further and distribution goes faster. COVAX, co-led by the World Health Organisation:WHO, GAVI and the Coalition for Epidemic Preparedness Innovations:CEPI and in partnership with UNICEF, has support from 190 participating countries. It still needs more than \$02 billion to fully meet its goal to vaccinate those most in need by the end of the year.

## || Medicine || NHS England Rolls Out Colon Capsule Endoscopy Cameras to Test For Cancer ||

|| Thursday: March 11: 2021 || α. Miniature cameras, which patients can swallow to get checked for cancer are being trialled across the NHS. The imaging technology, in a capsule no bigger than a pill, can provide a diagnosis within hours. Known as a colon capsule endoscopy, the cameras are the latest NHS innovation to help patients access cancer checks at home. Traditional endoscopies mean that patients need to attend hospital and have a tube inserted whereas the new technology means that people can go about their normal day.

An initial group of 11,000 NHS patients in England will receive the capsule cameras in more than 40 different places in the country. NHS has prioritised cancer care during the coronavirus pandemic and the latest figures show that hospitals carried out more than two cancer treatments for every patient they treated for COVID-19. In December alone, more than 25,000 patients were treated for cancer and more than 200,000 people came forward for checks, 13,000 more than the same month the previous year.

NHS Chief Executive Mr Sir Simon Stevens said, “As we come out of ‘peak COVID’ and the disruption of the pandemic, the NHS is now pushing ahead with genuine innovation to expand services for many other conditions. That’s why we’re now trialling these ingenious capsule cameras

to allow more people to undergo cancer investigations quickly and safely. What sounds like sci-fi is now becoming a reality and as these minute cameras pass through your body, they take two pictures per second checking for signs of cancer and other conditions like Crohn's Disease."

Dame Cally Palmer, NHS National Cancer Director, said, "It is thanks to the huge efforts of staff that more than 228,000 people started treatment for cancer during the pandemic and in 2020, hospitals carried out more than two cancer procedures for every patient they treated for the virus. As the NHS continues to prioritise cancer care, this latest innovation will ensure people can get the checks they need and conveniently; the cameras are small but they will make a big difference for patients."

Professor Peter Johnson, NHS Clinical Director for Cancer, said, "From the cutting edge technology of these colon capsules to COVID protected hubs and chemo home deliveries, the NHS has fast tracked new ways of treating and diagnosing cancer, all while responding to the coronavirus pandemic. The NHS message to anyone experiencing symptoms is clear: do not delay, help us to help you by coming forward for care. The NHS is ready and able to treat you."

Infection control measures required to make endoscopies COVID-secure mean that they take much longer to do, which has reduced the number of people, who can undergo the life-saving checks. The capsule endoscopy normally takes five to eight hours and provides full images of the bowel with information sent to a data recorder in a shoulder bag, so patients can go about their day. The cameras will help to speed up the checks, catching more cancers early when they are easier to treat.

The NHS Long Term Plan committed to increasing the number of tumours caught at an early stage from half to three in four. To further support cancer services, £150 million has been invested in diagnostic equipment, such as, endoscopy equipment and new MRI and CT scanners. Hospitals are using the funding to restructure their buildings with the funds to allow social distancing and help prevent the spread of the virus while continuing to deliver care.

NHS England has already invested £160 million in COVID-friendly cancer treatments, which do not hit patients' immune systems so hard and can reduce hospital trips, as well as, delivering chemo to people's doorsteps and using COVID-secure cancer hubs. At University College London Hospitals NHS Foundation trust:UCLH, the endoscopy team has already started using the innovative diagnostic tool. Clinical Lead Mr Ed Seward said, "Colon capsule is a new innovation, that has recently become available and involves swallowing a camera pill, that takes pictures of the bowel as it passes through. These pictures are beamed to a recording device, that the patient wears at their waist.

"Not only does colon capsule increase our diagnostic capacity, because it doesn't require the resources of a dedicated hospital space to do the examination, it, also, allows us to do the examination in the patient's home, so patients, who, may be shielding or cautious about going to a hospital, can perform the procedure in the comfort of their own homes."

Dr Alastair McKinlay, the President of the British Society of Gastro-enterology, said, “We welcome any initiative, that seeks to simplify and improve the early diagnosis of gastro-intestinal disease and, in particular, colorectal cancer, which, unfortunately, is still responsible for many avoidable deaths.

Colon capsule is a promising new technology, that, may, offer a real advantage for some patients. For this reason, we welcome the opportunity for a proper service evaluation so that both the limitations and advantages of this technique can be properly assessed. We welcome NHS England’s decision to work with some of the UK’s top experts in this field to make sure that the technology has a proper evaluation. This information will put the UK at the forefront of the world in this important new area.”

Ms Genevieve Edwards, the Chief Executive at Bowel Cancer UK, said, “This has the potential to make a huge difference for people with bowel cancer symptoms and could help the NHS to prioritise those, who urgently need further tests.”

**|| Political Economics || The European Bank for Reconstruction and Development and Green Climate Fund Extend Co-operation by \$497 Million ||**

|| Thursday: March 11: 2021 || ၎. The European Bank for Reconstruction and Development:EBRD has re-affirmed its commitment to scaling up green intermediated financing by approving additional headroom for the next phase of its successful large-scale partnership with the Green Climate Fund. An extension of the successful co-operation by \$497 million supports thousands of individual investments in technologies, that reduce emissions and enhance resilience to climate change.

The GCF-EBRD Green Energy Financing Facilities:GEFF programme, inaugurated in 2018, spans three regions and directs new climate finance flows to Armenia, Egypt, Georgia, Jordan, Moldova, Mongolia, Morocco, Serbia, Tajikistan and Tunisia. Sums, lent to local partner financial institutions, are on-lent to private sub-borrowers for investments in climate change mitigation and adaptation projects. The new extension will help maintain momentum and continue scaling up gender-responsive green financing. It is estimated that the latest extension will avoid CO2 emissions of 800,000 tonnes per year, which is equivalent to retiring 125MW of coal-fired electricity generation capacity.

The extension enhances equal opportunity to access green finance and technologies with a view to reducing existing gender gaps. The latest extension increases the framework headroom by up to \$497 million. Of this, \$373 million will come from the Bank's ordinary resources, with an equivalent of up to \$124 million of concessional financing provided by the GCF.

The \$01.4 billion programme benefits from GCF support amounting to \$378 million, out of which \$344 million is concessional co-funding and \$34 million is grants for technical assistance. Other donors supporting the programme include the GCF, the European Union, the Republic of Korea, Austria, Luxembourg, Japan and Turkey. As of end-2020, GCF GEFF product had been launched in eight countries in partnership with 18 local financial institutions and have already supported over 500 green investments.

EBRD's Green Energy Financing Facilities:GEFF provide credit lines to open up new financing paths and new markets of sustainable development for people pursuing climate investments and addressing the barriers women face. GEFF is a cornerstone of the EBRD's ambitious aim to become a majority green investor by 2025.

GCF was set up by 194 countries, which are parties to the United Nations Framework Convention on Climate Change:UNFCCC in 2010 to deliver equal amounts of funding to mitigation and adaptation initiatives in developing countries. The GCF-EBRD's partnership for transformation has seen the GCF support six EBRD programmes with \$830 million, catalysing more than \$03.6 billion in total project value. The GCF is the largest climate fund in the world, supporting the efforts of developing countries to respond to the challenge of climate change.

## || Political Economics || What Happens When A Suomalainen Wonders As To What Else Can One Do With Manure ||

|| Thursday: March 11: 2021 || á. Most of all human discoveries and inventions come out of the human soul's wondering, what, if? Here is such an outcome, arising from Finland, Suomi by which token, Suomalainen, those folks calling Suomi their home. Reducing HGV traffic emissions is an important part of Finland's 2035 carbon-neutrality target. One of its solutions can be found in cow manure: it can be made into bio-gas, that can, in the future, replace fossil diesel fuel, which is what HGVs in Finland currently run on.

The Vuorenmaa dairy farm has written a new page for the history books, as Finland's first manure-powered milk truck, filled up with the farm's own renewable bio-gas. The Vuorenmaa dairy farm, in Haapavesi, has 180 cows, that produce milk for Valio's local dairy, where it is made into Valio Oltermanni cheese. For years, the farm has used the manure its cows produced to generate electricity and heat for the farm at their own bio-gas plant. For the first time, that bio-gas has begun to fuel a Valio milk truck. Using bio-gas as vehicle fuel is a part of Valio's programme, that aims to reset milk's carbon footprint to zero by 2035.

“The Vuorenmaa farm’s bio-gas plant currently produces roughly 1,900 Mwh of bio-gas every year. We were overhauling the plant’s equipment and decided to expand its functions to produce bio-gas fuel. The milk truck from our local dairy at Haapavesi can fill up at our farm at the same time as they collect our milk. In the future, the fuelling station near the farm will, also, provide bio-gas for passenger cars.” Says Mr Janne Vuorenmaa, who runs the farm with his brother and family.

In the beginning, half of the gas they produce will be refined into bio-methane, which is suited for use as vehicle fuel. If, all that gas were to be used in milk trucks, it would be enough for a mileage of over 350,000 kilometres per year. For now, there is only a limited amount of bio-gas for passenger cars. It will be possible, however, to increase the plant's refining capacity to meet demand.

Roughly, 15 million tonnes of manure is generated every year in Finland. Usage of agricultural side flows is, however, still taking its early steps in Finland and using pressurised bio-gas, that is made of cow manure is a completely new development. Bio-gas will, also, play an important role in reducing not only traffic emissions but, also, in reducing agricultural ones.

“The bio-gas plant is a part of our farm’s regular nutrient circle. Its process transforms the nutrients in the manure into a form, that is more useful in the fields. When we need to buy less fertiliser, it benefits both the environment and our accounts. It, also, improves the farm’s self-sufficiency when it comes to energy. Selling farm-produced fuel is another business opportunity.” says Mr Vuorenmaa.

“Using bio-gas can reduce fuel's life-cycle green-house gas emissions by up to 85% compared to diesel, which is what our milk collection and distribution trucks run on. At the same time, the dairy farm's own carbon footprint goes down significantly, by one fourth or fifth, depending on the method of calculation.” says Valio’s Development Manager, Mr Petteri Tahvanainen, who is responsible for Valio's vehicle fleet.

“The Vuorenmaa dairy farm is a fantastic example of the ways Finnish farmers can solve environmental and climate challenges together with local businesses. At the same time, the farms can create new business, that is, new cashflow into the countryside, while improving our fuel-related self-sufficiency.”

The bio-gas plant and the bio-methane refining and refuelling station was manufactured by Demeca Oy, a company local to Haapavesi. “We have spent a long time developing our bio-methane refining unit and trialled various technical solutions. Now, a milk truck can refuel at the farm every day and the equipment is running well.” says Demeca Sales Director, Mr Sami Vinkki.

“We want to create new business opportunities for farmers and to improve the field’s respectability. Our job is to improve farm profitability, as well as, animal and human well-being. This is yet another project where that has been a resounding success. I very much like to refuel one of our cars at a customer’s farm. And the farm gets to keep all the profit.” says Mr Vinkki.

“A network of various local businesses has formed around the Vuorenmaa farm. They are close to the Haapavesi Cheese Factory, which means it is easy to refuel the milk truck during its collection run.” Says Pohjolan Maito co-operative's Managing Director, Mr Marko Puhto.

The milk is collected from the farm with transportation business H. Vähäaho Oy's new milk truck. “When this project started about a year ago, we were very excited. It's been a joy to see that all our partners have been just as excited to take part. There have been no significant surprises, as everything worked as planned, both for the refuelling system and the truck. Some people, may, say that such a small act is not enough to save the world but, we are excited to be a part of such a chain, that can result in concrete reductions in greenhouse gas emissions in the places that we live and breathe.” says H Vähäaho Oy's Mr Sami Vähäaho.

The manure is fed to the bio-gas plant through a pipeline from the barn. Other matter, such as, grass or spoiled feed can be mixed in the manure. The mixture is pumped into the biogas reactor, where it decomposes in an anoxic container. The gas rises to the top of the reactor, from where it is collected and purified for use. This process takes 30–40 days.

In bio-gas production, the manure's fertilising capability improves and the smell is removed. The manure turns into a material of uniform quality, that is so rich in nutrients that it is possible to reduce the use of commercial fertiliser. This saves both money and the environment. The refined manure produced in the bio-gas plant can, also, be separated into dry and liquid fractions. The liquid, which contains the nutrients, can be used to fertilise the fields. The dry fraction, on the other hand, is so dry and high in quality that, in addition to its use as a fertiliser, makes it possible to use it as litter for the cows' bedding instead of peat or sawdust.

About Valio [valio.fi](http://valio.fi): Valio's mission is to create well-being and taste sensations in a responsible way. We make tasty products from milk and many other ingredients; we bring delightful tastes, variety and joy to the food table. We, also, carry out important roles in society: ensuring food security, enhancing public health and improving animal welfare are some examples of our impacts. In line with our mission, we are making life better. This is also the conclusion of the Finns who have chosen Valio as Finland's most sustainable brand for seven consecutive years. 4,300 Finnish dairy farmers own Valio through co-operatives. We pay out all the profits to our milk producers through the milk price. We employ a total of 25,000 people at dairy farms. Valio has 4,000 professionals at work from different sectors and we listen to consumers with our more than 100 years of experience.

# || Literature || The EBRD Literature Prize 2021 Announces Ten-Author Long-List ||

|| Thursday: March 11: 2021 || α. The European Bank For Reconstruction and Development:EBRD Literature Prize 2021, launched by the Bank to promote translated literary fiction from its regions of operations, announces its selected longlist today. This is now the fourth year of the EBRD Literature Prize, which celebrates the very best in translated literature from the nearly 40 countries where the Bank invests: from central and eastern Europe to Central Asia, the Western Balkans and the southern and eastern Mediterranean.

The €20,000 Prize is awarded to the best work of literary fiction originally written in a language from one of these countries, which has been translated into English and published by a UK or a Europe-based publisher. The international Prize was created in 2017 by the EBRD with funding provided by the members of the EBRD, in co-operation with the British Council. It is one of the few international literature prizes, which recognises both author and translator in equal measure.

The independent panel of judges for the EBRD Literature Prize 2021 has selected 10 novels, that they consider outstanding works of storytelling. In total, eight languages feature on the selected

longlist, which represents a fascinating mix of cultures from across the EBRD regions of operations. The finalists, three authors and their translators, of the EBRD Literature Prize 2021 will be announced on May 03. All will be invited to attend the award ceremony later that month, date yet to be determined, where the winner of the EBRD Literature Prize 2021 will be announced.

Mr Toby Lichtig, the Chair of the Judges, said, "Given the diversity of territories, covered by the EBRD, it is, perhaps, unsurprising how varied and culturally rich this longlist is, both thematically and stylistically. The ten books move us from 1930s Warsaw to 1950s Czechoslovakia to contemporary Ukrainian no man's land; from a Kafakaesque tale of judicial injustice to an absurdist tragicomedy of human smuggling; from the dying days of the Ottoman Empire to an alternative Balkans hauling itself into the present day. Taken together, they give a picture of a Eurasian region riven with the scars of war and displacement, cruelty and carelessness and teeming with human resilience and ingenuity. And love. Each book is unique, each translation brilliantly realised."

The longlist titles, in alphabetical order by author, are: *Love in the Days of Rebellion* by Ahmet Altan, translated by Brendan Freely and Yelda Türedi: Europa Editions: Language: Turkish. Country: Turkey.

*The Pear Field* by Nana Ekvtimishvili, translated by Elizabeth Heighway: Peirene Press. Language: Georgian. Country: Georgia.

*Grey Bees* by Andrey Kurkov, translated by Boris Dralyuk: MacLehose Press, an imprint of Quercus: Language: Russian. Country: Ukraine

*Carbide* by Andriy Lyubka, translated by Reilly Costigan-Humes and Isaac Stockhouse Wheeler: Jantar Publishing Ltd. Language: Ukrainian. Country: Ukraine

*Hana* by Alena Mornstajnova, translated by Julia and Peter Sherwood: Parthian Books: Language: Czech. Country: Czech Republic.

*No-Signal Area* by Robert Perisic, translated by Ellen Elias-Bursac: Seven Stories Press: Language: Croatian. Country: Croatia.

*The Highly Unreliable Account of the History of a Madhouse* by Ayfer Tunc, translated by Feyza Howell: Istros Books: Language: Turkish. Country: Turkey.

*The King of Warsaw* by Szczepan Twardoch, translated by Sean Gasper Bye: Amazon Crossing: Language: Polish. Country: Poland.

*Mr K Released* by Matei Visniec, translated by Jozefina Komporal: Seagull Books: Language: Romanian. Country: Romania.

*Your Ad Could Go Here* by Oksana Zabuzhko, translated by Nina Murray, Marta Horban, Marco Carynnyk, Halyna Hryn and Askold Melnyczuk: Amazon Crossing: Language: Ukrainian. Country: Ukraine.

The EBRD Literature Prize is a project of the Bank’s Community Initiative, a programme, which provides a framework for the engagement of staff and the institution in philanthropic, social and cultural activities in the regions where the Bank works.

The Chair of the Community Initiative, Mr Kazuhiko Koguchi, said, The Literature Prize reminds us of the wealth of creativity and cultures across our regions of operations and highlights the role of storytelling in connecting us all and building bridges across borders.

**What Are Building-Block Foundational Human Rights**

**Ask Your Political Leaders About Building-Block Foundational Human Rights and Ask Them About Humanics**

**The Building-Block Foundational Human Rights**

- A: Absolute Right to Live in Clean, Healthy, Safe and Natural Environment
- B: Absolute Right to Breathe Natural, Fresh, Clean and Safe Air

- C: Absolute Right to Necessary Nutritional Balanced Food and Drink
- D: Absolute Right to Free Medical Care at the Point of Need
- E: Absolute Right to an Absolute Home
- F: Absolute Right to Free Degree-Level Education and Life Long Learning
- G: Absolute Right to Guaranteed Social Care
- H: Absolute Right to a Universal Income
- I: Absolute Right to a Job
- J: Absolute Right to Dignified Civic and Human Funeral Paid Through by Universal Income

**This Is the Body of Work, by Munayem Mayenin, That Has Brought Into Existence the Philosophy and Vision of Humanics**

**Dehumanisation of Humanity: Volume One: Published: July: 2007: 978-1-4477-1330-2**

Mayenin worked and developed the very critique of capitalism and Marxism while at university in which he had envisioned the world's future in humanics for humanity to reach and achieve liberty and equality for all humanity, which capitalism has continually slaughtered and Marxism failed desperately, even, to understand, let alone, to know or show how to seek and achieve them. Some of these works were published in publications in the early 00s and the volume was published as a book in 2007. There are three other volumes of this planned work, yet to be published.

**Humanics The Foundation: Volume One: Published: December 06: 2017: ISBN: 978-0-244-34575-4**

This piece of work elaborated the philosophy of humanics and presented the idea of human enterprise and how it works to enable humanity to conduct the human economical endeavours in humanics.

**Humanics The Humanicsonomics: Volume Two: Published: June 12: 2018: ISBN: 978-0-244-48334-0**

This is the political economics or humanicsonomics of humanics in human enterprise. This volume presents the political economics of humanics and envisioned world's future as two distinct phases: pre-humanical or Kapitalawnomics phase in which capitalism is saved from pseudonomics and brought under the absolute and complete control and power of the rule of law so to make it serve the people at all times and not the rich and through this phase, humanity brings into existence the humanical Building-Block Foundational Human Rights and end capitalism's Poverty Paradigm, that causes all of the high-cruelties, high-brutalities and high-barbarities, that are inflicted on the

vast number of humanity on this earth. Further to this, this work advances the system and mechanism of human enterprise and envisioned at the end of the development of Kapitalawnomics human societies will have developed enough to be able and equipped to try and seek to bring into existence humanical societies, that will begin to form a grid of humanical societies into a universal humanical civilisation on earth.

**The Humanics Elleesium Declaration 2019: The Humanicsxian Manifesto: Published: April 06: 2019: ISBN: 978-0-244-76474-6**

This short piece of work nano-summarised the entire body of Munayem Mayenin's works on humanics. This calls on the working humanity of the world to rise, organise and united under new and humanical political forces, parties and organisations to seek and try to bring about a humanical world movement to lead humanity to equality and liberty.

**Humanics The Humanicsovics: Volume Three: To Be Published Later This Year**

This volume presents the political philosophy of humanics and the means to deliver that political philosophy by and through humanicsovics, humanical direct form of democracy without party politics whereby each and every individual human being becomes his:her own High Representative and they all run their society's human affairs management together as individuals, working together as scientists and mathematicians without any political parties.

**Alphansum Sovereign Necessarius: Published April 14: 2020: ISBN: 978-0-244-58241-8**

Although, this large volume is of metaphysical work, it has brought the whole humanical universal view in a harmonious outlook, unifying all expressions, fields, areas and arenas of human existence and in this process this work envisioned the coming into existence the new branches of science, that has already been mentioned.

**Laranska The Anatomy of Fear: Novel: Published: January 2009: ISBN: 978-1-4477-1426-2**

**No Man's Land's Bloom: Play: Published: May 2010: ISBN: 978-1-4477-0903-9**

**United Colours of Blood: Screenplay: Published: January 2009: ISBN: 978-1-4477-1615-0**

**Larantia Poetry of Anatophysiophilosophicamonimayareginata: A Magnum of a Planned Volume of 850 Sonnets About All Branches of Medicine: Currently Having Few Hundred Sonnets: First Published: October 14, 2016: ISBN: 978-1-326-28882-2**

In his other major bodies of works, that are yet to be published Mayenin has worked on further in elaborating the psychology and social psychology of the zoohumanity, that capitalism and all the dehumanisations it has inflicted on humanity through its enforcement of inequality and the

absence of liberty. These as yet unpublished works include: Psychology of Zoohuman, Humanical Jurisprudence, Sociology of Evil, Economics of Squalors: The High-Cruelties High-Brutalities and High-Barbarities of Capitalism, Humanical Moral Science, Social Morality Or Good State, Humanical Civilisation: A Universal Grid of Humanical Societies and Colossus Complexus: Eternally Learning Humanity.

|| Humanity Will Continue to Live an Inferior Life Than What is Possible Until the Two Halves, Women and Men, with All Individuals in Them, are Absolutely, Fundamentally and Jubilantly Equal at Liberty. Humanity, Therefore, Is Not and Can Not Be Free Until All Humans are Equals for Only by the Yardstick of This Equality Their State of Being Free Can Be Measured. In Other Words, There Can Not Exist Liberty Unless There Exists Equality Between and Among All Humans and This State of Equality Can Not Come to Exist So Long There Remain Two Groups of Humans: The Powerful and The Powerless: Whereby the Former Controls the Later and Creates, Maintains and Carries Forward the Perpetual State of Inequality: Economically, Politically, Judicially, Constitutionally, Socially, Culturally and Spiritually. To Reach the State of Equality and Liberty, the Task Before Humanity is, Therefore, to Change This State by Taking Away Ownership and

Money and, with Them, the Power They Generate and Confer, That Lets One Small Group of Humans, The Powerfulls, Subjugating the Vast Multitude of Humans, The Powerless, Under Their Dictatorship. For Only by Taking Away 'the Gun' of the Power of the Powerfulls, Humanity Can Bring About the State of Liberty, as Well as, Equality at Once: Equality and Liberty Can Not and Do Not Exist Separately But Together and Simultaneously. Equality and Liberty Exist as The Promethumean Fire: In Which There is the Light and There is the Heat in One Flame: The Humanion Stands Here on the Path of Humanics: A State of Liberty for All Humanity at Equality. The Promethumean: Where Prometheus is Not Seen as a Man But a Human: In Short, Regine Humanics Foundation Ltd and The Humanion Stand for These and Exist and Work for the Promotion of This Vision of Humanics for a Better Human Condition for All Humanity Across the Mother Earth on the Mother Universana: We Invite You All for Your Support: Join Us in Telling the World and World Humanity That: An Infinitely Better Human Condition for All Humanity Across the Mother Earth IS Possible. || Regine Humanics Foundation Ltd ||

Regine Humanics Foundation Ltd Publishes The Humanion, The Humanion Portable Daily and The Humanion Larnaarch, among doing other things: We do not and shall not accept fundings or contributions from any type, form, manner and layer of Governments of national, international, supra-national or any other type or bodies formed by them nor from rich individuals or bodies or agencies of any kind. This, to us, is as a matter of absolute philosophic principle to ensure our resolute and complete independence.

The ways, in which, we invite support from the readers, members of the public and all other individuals and agencies and businesses of any kind, are: a: Voluntary Subscription Payments: b: Voluntary Contributions: c: The Minimal and Symbolic Membership Fees to Our Regineumanics Family: d: Buying a Copy of The Long Walk to Humanics: e: Contributing to Our Events: f: Subscribing to Our Publications and g: Advertisement in The Humanion Group of Publications.

You make a conscious, wilful and philosophic choice to Support The Regine Group of Publications and The Foundation. If, you do: thank you: If, you do not, thank you, too, for reading The Humanion and The Humanion Portable Daily.

The world has, apparently, accepted that Capitalism is the High Pinnacle of All Systems and, some still dream that Marxism will rescue humanity from this Killing Mechanism Capitalism, we refuse to subscribe to that. Humanics is the Post-Marxist and Post-Capitalistic World View of What Humanity can be and what it can do and how infinitely better a human condition can be created in a Humanical Society, by eradicating ownership and money and by establishing belongingship in

human enterprise, setting all humans at liberty and equality under the rule of law in natural justice with a direct form of democracy, humanics calls it, Humanicsovics, in which, each human soul is her:his own High Representative. In this, Humanics is the Minority Vision and we do not and can not expect millions and billions of people supporting our vision today but We Whole-Heartedly Believe That ONE DAY This Humanity Shall BE ALL HUMANICAL: By When: We Know Not But This: That Being a Monstrous Killing Mechanism Capitalism IS Unsustainable: The World Shall Change One Day and Every Change Begins with an Idea, with a Vision:

We invite you to Envision the Vision and Philosophy of Humanics and Support The Humanion, The Humanion Portable Daily, The Humanion Larnaarch and The Foundation to Keep Taking Forward the Vision and Philosophy of Humanics, to Keep on Challenging Capitalism's Poverty Paradigm, for an Infinitely Better Humanity in an Infinitely Better Human Condition for All Humanity Across Mother Earth. Thank You.

There can not be any sustainability until and unless we take the view that sustainability comes as philosophical, political philosophical, political economical, ethical, moral, sociological, educational, jurisprudential, socio-cultural and ecological and humanical spiritual so that we are able to create a sustainable 'architecture' of existence in a clean, green, circular and sustainable political economics, that underpins all forms and expressions of sustainability and when such an 'architecture' exists within the Larin Paraske Maxim or Oath: Do No Harm to Anyone or Anything: all things and all living forms must have equitable status in the sphere of all existence or all life on earth, with an emphasis on the Universana. Because humanity does not just exist on earth but it does so in the Sunnara, in the Home Bay of the Milky Way Galaxy in the vast expanse of the Universe, our home Universana. Dear Reader, we are on the path of humanics, please, tell the world and world humanity that humanics has arrived on earth from 'the without of human imagination', learning, questioning and thoughts, gained from the eternal walks of this human soul's eternal journey on the eternal path of eternal learning, with its humanical metaphysics, humanical philosophy as natural science, humanical psychology, humanical political philosophy, humanical political economics, humanical jurisprudence, humanical sociology, humanical moral science and humanical arealism. For capitalism has created global warming and climate change and wracked the earth with environmental degradations and pollutions in all spheres, where bio-diversity is getting lost at an alarming rate as the earth keeps on being heated up. Humanity is devastated by capitalism's poverty-paradigm, delivering all its high-cruelties, high-brutalities and high-barbarities. This is why it is paramount that that we speak up and out and try our hardest to inspire faith, hope, determination and resolution among all humanity of this world, women and men, that

we shall not just accept this 'sentence of doom', that capitalism's mindless consumerism, infinite greed of infinite profiteering, decadent voguism and venomous voyeurism, orchestrated by the Distorteddia have brought us and, yet, that we can, we should, we ought, we must keep on trying: 'to seek to try: to do: to change: to make better the human condition' and we do so as one humanity, as women and men, working together as one, in unison with the same aim, same goal, same objective: to get all humanity to liberty, equality, fairness and justice in the rule of law in natural justice, with a purpose and meaning to our existence, where we all humanity, with our all-unity and all-diversity, exist as one humanity naturale on one Mother Earth, in one Sunnara, in one Home Bay Milky Way Galaxy in the one Universana with the humanical foundation of faith: humanity is an infinity unfolding itself, in which, we are all-for-one and one-for-all.
