The COVID-19 pandemic has demonstrated the utter failure of the current world wide political, social, and economic relationships and expose the all-pervasive cancer which is globalization a system of vicious competition naked exploitation and predatory financial arrangements among nations and within nations. While relatively wealthy nations are racing to vaccinate their own populations and a country like the United States is hoarding tens of millions of vaccines that it does not need many countries cannot afford the means to vaccinate their people. *P-05*

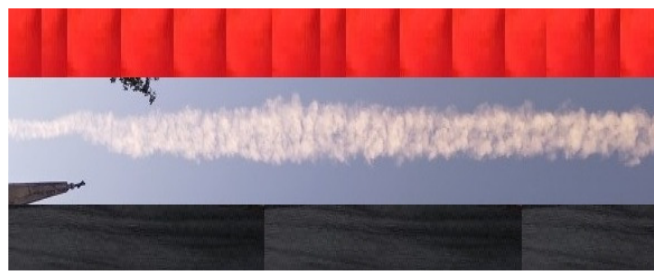

What The Humanion Portable Daily Resumes Publication

In a year of the Pandemic, when the UK has recorded over 150,000 deaths and the world is going towards registering three million, The Humanion Portable Daily struggled by the same Pandemic. We resume publication with the re-assertion that the world can not exist as it is: we need to work for change: The Humanion Portable Daily is a vitally necessary voice: that is needed and we shall keep on going for change: for a better world for all humanity of this earth. Let Racism or Self-Loathing Get Into Dust With Its Lies, Fabrications, Falsehoods, Mythologies, Conspiracy Theories and Obnoxious Supremacy Conjectures and With Its Hatred. We Can, With Certainty, Science and Evidence Now Say That It Takes, at Least, 10,000 Years of Evolution or 300 Generations in a Different Environment Than Where It Has Come From for Humanity to Become Physically Diametrically Different, i.e, That Black May Become Brown or White May Become Black or Black Become White Or Brown Becoming Black Vice Versa.

That There Is One and the Same Humanity, That Resides Inside All Different Physiological States and Expressions of All Humanity Across the Earth and All Humanity, the Entire of the Seven Billion Plus of Us Across the Earth, Arises Out of the Same Species of Humanity, Called Homo Sapiens. That's the Only Humanity There Is On This Earth: Cosmogeogenomodynamics Shall Open Up This New Field of Science and Educate, Enlighten and Illumine Us Towards the Illumination With Pure, Clear and Joyful Light of Science: Humanity: We Are One.

|| Cosmogeogenomodynamics || The First Paper on the Necessity Validity and Urgency of Cosmogeogenomodynamics ||

such as, Duantum Physics, Hearteogenics, Beauroblubellogenics, Cosmography, Cosmovicology, Humanical Moral Science, Cosmogeogenomodynamics is proposed as a new branch of a vital science, whose necessity, validity and urgency we are to write and elaborate on this first paper on the subject, which should study the evolutionary, genomic, biophysical, geophysical, biochemical and cosmological impacts on the human physiology and psychology to understand how human physiology and psychology find themselves exposed to an almost-infinite number of geological, earthian, solarian and cosmological forces and variables, which are >

determining their size, shape, colour, texture and other attributes, as well as, the very size, structure, shape and function of their various physiological organs and systems and working as an infinite source of determinative evolutionary perimeters. Back in the mid-eighties when this Author was developing the entire basis and foundation of humanics as he was already on the way to find Duantum Physics with which he began his ever-going questioning about darkness as to what it was, that no one did or could answer, including, the fact as to why the entire Universe was infinitely engulfed in an infinity of that darkness, that no one could understand or define, he found the absence of the most vital of all sciences so far the human existence was concerned, the term for which we are using today is Cosmogeogenomodynamics: cosmo-geo-genomo-dynamics.

We have nothing as science to bring about this giant of a viewscape and study how human physiology and psychology get impacted by all these geological, geophysical, geo-dynamical, seismological and cosmological forces and variables and how they are not only impacting and directing but, also, guiding an evolutionary constant contra-flow to-and-fro dynamics of functioning, development and evolution for the human physiology and psychology. Why on earth have we not developed this branch of science centuries ago so that we would now be able to understand these things better and get ourselves rid of all the mythologies, lies, falsehoods, fabrications and political poisonings of hatred, racism or self-loathing, devastating humanity all over the earth. This branch of science would have established the clear pictures so that we could see everything in the crystal clear vision of pure and clear science. This began following an incident in this Author's life. The dark regressive forces never liked this Author much and in Baangladesh they called themselves vanguards of 'Islam' and they tried to kill him with their physical violence and brutality and he was savagely attacked and disfigured. However, he survived. Until that point, he would get to notice the full moon when it adorned the sky but, were the weather to be gloomy, he would not notice the fact that it was full moon. But following this attack in which his right arm was cut at the middle so that there are stitches and a lot of the blood vessels damaged and a lot of them got narrowed in that area, that causes pain, still now, he began to notice when it was full moon, even, when the moon was not visible in the sky. That was because he would notice and feel a pain, building up in that space of his right arm. It felt, as, if, more blood was seeking to pass through those narrowed vessels and, thus, creating pressures, that felt as pain. That only happened when it was full moon. That's the only way that phenomenon could be explained. **As the branches of science, such as, Genetics, Epigenomics, Quantum Physics, Computer Science etc, did not exist before, Cosmogeogenomodynamics did not exist until now but it shall come into existence and become an established science as the ones mentioned. This is the way human progress is made**

There can never be an app that will replace a surgeon doing the surgery nor there can ever be a bridge built, symphony composed, epic written, painting painted by a machine. Reading is such a vital thing in pursuit of knowledge for without reading knowledge is rudimentary. The Humanion is for Readers to Read. The Humanion is not for anything else but for Readers to read so to be encouraged to think and ponder about things.

The Humanion is a Human Enterprise which is an idea in which no one owns anything but everyone belongs to the whole as the whole belongs to everyone lawfully and equally and, it neither believes in nor makes money but human utilities, needs, aspirations, creativity, imagination and dreams are served without money, where everyone works and creates for others as others create and work for them, thus, bringing in meaning and purpose to life along with it come natural justice, equality and liberty that establish a true civilisation. And in one word, this system of human affairs management is called, Humanics and a society, that runs itself in humanics is called a humanical society. || Political Economics: Clean Green Circular and Sustainable: The Larin Paraske Oath: Do No Harm to Anyone Or Anything ||

|| Friday: February 14: 2020 || á. This story is not about just a bridge in Togo but about people of Togo. A story of a young woman, named, Ms Robiro Kadokah, a business woman, having a go of her life better because of a bridge, that was not there because bridges need to be built, for which investments are needed to be made. Except, now that that bridge has been built, it is giving young Ms Robiro Kadokah and many people in communities, from around near and far, means to make a go of their life, only, better and that can be seen in the confidence with which they speak and the smile, that they craft, that a confident life inspires and sustains.

Political economics is about this: about this and nothing else. That, the policy-makers and the bankers and their leaders still fail to understand in their air-conditioned offices and headquarters and in all their ‘pseudo-jargons’. It is about making life better and better for all. That is what, in a money-based system, happens only with political will and choice but, at the same time, when that political will and choice are transformed through what the ‘money people’ do or, rather, how they make those investments, like these development banks across the world. They must now learn fast that development means nothing unless it means development for people: individuals, families, communities, agencies and organisations and society as a whole. || Published in The Humanion: Saturday: February 15: 2020: Image: Robiro Kadoka at Her Business: From Toga: Image: African Development Bank || **Change Because We Choose to Will and Work For It ||**

|| Like Cosmogeogenodynamics One Day Shall Arise and Become an Established Branch of Science: Evolutionary Geopalaeontological Anthropology: That Shall Show Humanity How It Has Evolved and Developed Across Ages and Across the Earth From Its Origin of One Primal Father and One Primal Mother ||

|| Tuesday: April 06: 2021: Munayem Mayenin || á. This epic of the origin, development and evolution of humankind has barely begun and, despite many different branches of learning, knowledge and wisdom, giving us knowledge about it, we are far away from getting the whole picture, that is crystal clear and without dispute because it has arisen out of pure scientific endeavours. This is because we have so far failed to discover and develop that vital branch of science, which is what we are calling Evolutionary Geopalaeontological Anthropology.

Much more to come on this epic as we invest more in the development and advancement of this new branch of science: this branch of science will look into humanity and its origin and development with the eye and ways of science, which so far we have not been able to do so that, instead science we have ended up with much fabrications, concoctions, conjectures and mythologies about humanity and its unity and diversities. In association with Cosmogeogenodynamics Evolutionary Geopalaeontological Anthropology will make our children and grandchildren and the future humanity infinitely wiser, superior and enlightened humanity that we can ever imagine humanity becoming. We shall write further on this new branch of science, that humanity needs desperately.

|| Humanics || How Long Can We Tolerate the Deprivation of an Economic Super Structure That Tramples the Dignity of the Human Person: When Will the People Rise Up and Say No to Capitalism Imperialism and Contrive Nationalism: I Can Truly Say It Is Now or Never ||

The raw self-interest of nation states has raised its tentacles to circle its own wagon and exclude everyone else (with few exceptions like Cuba). Many nations that have been exploited by Europe and the United State for over 300 hundred years have been further impoverished while these rich nations looked on with complete indifference. Indeed, if it was not for the history of colonization and recently structural adjustment nations in Africa, the Americas and the Caribbean would have resources to Adequately prepare for the current pandemic.

The pandemic has laid bare the open wounds of the global capitalist system and the urgent need for people of good will all over the world to join hands in creating a new world order on the building blocks of humanistic socialism that embraces the unity of the human race, the unity of science and philosophy and the common destiny humankind. As specie beings we have the capacity to constantly remake the world into a more livable place through collective work and responsibility recognizing that each person has dignity that must be respected. Anything I do to diminish another person diminishes humanity, not in Kantian sense of pseudo universality which puts European man at the center of the universe, but a universality that links all peoples, cultures, animals, indeed, the whole cosmos as an organic whole.

Social degradation and environmental degradation are explicable linked. How long can we tolerate the deprivation of an economic super structure that tramples the dignity of the human person? When will the people rise up and say no to capitalism, imperialism and contrive nationalism? *P-07*

|| Jurisprudence || US Rescinds ICC Sanctions: President Biden Should Support Global Court of Last Resort ||

|| Monday: April 06: 2021 || á. US President Mr Joe Biden’s cancellation of punitive sanctions, targeting the International Criminal Court:ICC removes a serious obstacle to the Court providing justice to the victims of the world’s worst crimes, Human Rights Watch said today. On April 02, 2021, Mr Biden revoked a June 2020 order by previous President Mr Donald Trump, authorising asset freezes and entry bans to thwart the ICC’s work. In announcing the repeal of the executive order, Secretary of State Antony Blinken said, “These decisions reflect our assessment that the measures adopted were inappropriate and ineffective.” The State Department, also, lifted existing visa restrictions. “The Trump administration’s perversely punitive sanctions against the ICC showed stark contempt for the victims of grave international crimes and the prosecutors, who seek to hold those responsible to account.” said Mr Richard Dicker, the International Justice Director at Human Rights Watch. “In removing this unprecedented threat to the global rule of law, President Biden has begun the long process of restoring US credibility on international justice through the ICC.” The Trump administration put the sweeping executive order into effect in September, when it imposed sanctions on the court’s prosecutor, Fatou Bensouda and another senior official, Phakiso Mochochoko. It had repeatedly threatened action to thwart ICC investigations in Afghanistan and Palestine. In 2019, the Trump administration had revoked the prosecutor’s US visa. Human Rights Watch had urged the Biden administration to rescind Trump’s executive order as a matter of priority. The Trump administration’s order was a threat to the global rule of law and the court’s work in bringing justice to victims. **P-17**

|| Humanics || How Long Can We Tolerate the Deprivation of an Economic Super Structure That Tramples the Dignity of the Human Person: When Will the People Rise Up and Say No to Capitalism Imperialism and Contrive Nationalism: I Can Truly Say It Is Now or Never ||

I can truly say it is now or never. We have passed the tipping point and only collective action can avert the decline and stave off the cataclysmic end over time. Humanistic Socialism rejects myth making, mystification, violence and war. It is grounded in the principle of complementarity and reciprocity and seeks to reduce overt nationalism and invented histories that are based on deceit and lies. It recognizes that capitalist exploitation, individualism and conspicuous consumption are inextricable link to violence and war, and as the struggles for more consumption continue the greater the economic, physical and psychological violence on the vast majority of humanity.

Humanistic socialism rejects the idea that modern economic laws are based on scientific principles with almost metaphysical qualities but recognizes that they are cultural construction that creates instruments of exploitation as is so evidently display in derivatives and other tools of fictive economics. A basic question that has confronted us for at least the past fifty years is whether or not it is possible to cultivate humanistic values in a totalitarian technological age? It is even more urgent today to address this question with the rise of monstrosities like Facebook and Google. It is in light of this pressing question that I salute The Humanion and its editor, working under extremely adverse conditions for continuing to promote humanistic values to elevate humankind to a higher level of co-operation and solidarity. This news organization is indeed the voice of the people. Let us lift it up and embrace it as an instrument for good in the world as we continue to search for common ground in these very difficult times.

The Word The Book The Humanity

|| Invite Everyone to Take Up the Special Free Annual Subscription Offer of The Humanion Portable Daily ||

|| The story goes like this: about the chickens and the foxes. The vast range of the news, media and press outlets are owned by the foxes so that nothing gets mentioned in them about the horror and nightmare the chickens have to endure under the tyranny of foxes and what that entail for the chickens.

There are texts, images and videos and a whole lot of manipulations being published in The Foxonews and they publish a lot of things about the chickens, as, if, to suggest that the chickens have been placed in heaven on earth. Unless the chickens get their outlets up and going their voices of nightmare and horror will continue to be unarticulated. Take an example of the manipulations: there are 63 million people in the UK: Except, they pay some Pollsters, who speak with a couple of thousands of people and, then, they tell the country the Conservative Party is 35 points ahead in the polls, despite making a huge sociological squalor in the country, where the working and non-working people are being devastated by terrible poverty of all kinds and, yet, they are the majority of the nation. Then, how do you square this up with the fact that this very majority is manipulated in each and every election to vote for the very parties, that devastate their lives into power!

They tell the world that capitalism is the high pinnacle of human development: you look at the infinite mess capitalism has spread all over the earth, the countless millions of humans dying of suffering 'poverty' of all kinds every year, including, millions of children and you make a list of what monstrosities capitalism creates, sustains and distributes and you decide whether capitalism is the high pinnacle of human progress: And should you decide it is nothing of that, it is time you look up humanics and challenge capitalism and work to change the human condition for the better for all humanity across the mother earth.

|| Choose to Exist As The Change-Creator ||

The world does not change because one day all humanity wake up in the morning and decide to change it: it changes nano-scale every day by everyone making a choice to do and be that change, that they want to seek and achieve: nano-scale building towards nano-seismic. One human soul to the next: one by one, joined by others, one day, there appears some murmurs of a French Revolution, that keeps on building up: nano-scale to nano-seismic.

Droplets of water keep on flowing towards the other droplets and they gather together as they form drops of water, which keep on building up and build a spring soon and it keeps on going until these droplets of water form a mighty ocean.

The world does not change the way it should unless we work at it. It is like a house: it requires a vision of the house, that, gets translated into an architectural plan of the house, which, then, gets translated into the engineering, which, then, goes about enabling the building up of the house, which, then, gets built up and one day, suddenly, the house is risen onto the sky.

Humanics has brought forth Building-Block Foundational Human Rights as only ideas: now, these ideas are here and they require everyone's attention and evaluation and from there they will be taken up and more and more will hear of them and do the same: evaluating and seeking to make a choice and soon, there will come a time where enough of humanity will be speaking of them and these voices will take them further and, one day, the Foundational Human Rights will become real, transforming the human condition beyond our imagination. When is not the right question: how is: This is how: we keep at it: we keep on being and doing that change: that change, what we want to bring about and make real. Choose to exist as the Change-Creator.

|| Literature || English PEN's Translation Grant Is Now Open For Submissions ||

|| Monday: April 06: 2021 || α. English PEN's flagship translation grant is now open for submissions. Launched in 2012 with support from Arts Council England, PEN Translates helps UK publishers to meet the costs of translating new works into English, while ensuring that translators are acknowledged and paid properly for their work. The deadline for applications is May 31.

The programme has now supported over 300 books and awarded over £01 million of funding. 12 titles supported through PEN Translates have featured on International Booker Prize longlists in the last five years. PEN Translates is open to works from all languages, and it is not essential for publishers to have acquired the rights at the time of application, as long as they have permission from the publisher of the original.

PEN Translates awards are assessed based on: literary quality, strength of the publishing proposal and contribution to UK biblio-diversity.

Applications from underrepresented are, particularly, welcome, in forms and genres, e.g, children's literature, YA, graphic novels and underrepresented languages and geographies, e.g, indigenous languages, Oceania literatures, Sub-Saharan African languages.

Publishers should note and use the revised application form available on the English PEN website and apply through our new submissions form.

Sophea Payne: Festival Co-ordinator at the Festival

To the VIII London Poetry Festival 2020: October 14-15

“Across the history of human progression progressive and regressive forces fought: the former for bettering the human condition, the later to keep serving its own consumeristic, selfish, indulgent and corrupt self-interest to maintain the status-quo. Where and when progressive forces won the human condition advanced and where and when regressive forces won the human condition worsened and taken backward. The current world is overtaken by the regressive forces and it is, therefore, absolutely paramount that progressive forces unite and work together in concert and in unison to fight back and direct the human condition towards the progressive path once again: towards liberty, equality, justice and fairness for all. ”: Munayem Mayenin

|| England || Thousands of Patients Are Set to Benefit From Five-Minute Breast Cancer Treatment ||

|| Monday: April 06: 2021 || α. An injection, PHESGO, that would cut the amount of time breast cancer patients spend in hospital from two and a half hours to as little as five minutes is being rolled out across the country by NHS England. Breast cancer patients under-going chemotherapy will be offered this new combined treatment, which is injected and takes as little as five minutes to prepare and administer, compared with two infusions that can take up to two and a half hours.

More than 3,600 new patients each year will benefit from the treatment, as well as, others, who will switch from the treatment they are on to the single injection, following an NHS deal with the manufacturer. The injection will be offered to eligible people with HER2-positive breast cancer, which accounts for 15% of all breast cancers, and can be given alongside chemotherapy or on its own.

The five-minute injection significantly cuts the COVID infection risk for cancer patients by reducing the amount of time spent in hospital and frees up time for clinicians in chemotherapy units. The announcement is the latest in a series of innovations in cancer care during the pandemic, including Covid-secure surgery hubs, that were set up across the country and £160 million invested by NHS England in ‘covid-friendly’ cancer drugs, that treat patients without having such a big impact on their immune system or offer other benefits, such as, fewer hospital visits.

Since the start of the pandemic, 228,000 people have started NHS treatment for cancer, 95% of whom did so within a month. Hospitals across England have carried out more than two cancer procedures for every patient they treated for coronavirus last year. Care providers were told they could begin offering the treatment in February and the agreement between the health service, NICE and the manufacturer means it comes at no extra cost to the NHS.

NHS National Clinical Director for Cancer, Mr Peter Johnson, said, “The NHS has continued to adopt new treatments rapidly throughout the pandemic, to improve cancer care for patients. This new injection, which can substantially cut treatment time for people with breast cancer, is the latest in a series of changes which have meant the NHS has been able to deliver vital cancer treatment while keeping patients safe from COVID.

Baroness Delyth Morgan, the Chief Executive at Breast Cancer Now, said, “Approval of PhESGO being used on the NHS in England is fantastic news as thousands of women with HER2 positive breast cancer will now benefit from a quicker and kinder treatment method. Reducing the time patients need to spend in hospital, this more efficient treatment method also promises to free up precious time for healthcare professionals when the NHS is already under unprecedented strain due to COVID-19.”

PHESGO is a fixed-dose combination of Pertuzumab with Trastuzumab, that previously would have been given as separate IV infusions. The NHS has prioritised cancer care during the coronavirus pandemic and the latest figures show that hospitals carried out more than two cancer treatments for every patient they treated for COVID-19.

|| Africa || Thousands on the Move After Brutal Attacks in Northern Mozambique: OCHA ||

|| Monday: April 06: 2021 || á. Thousands of people in Mozambique’s northern province of Cabo Delgado are on the move in search of safety, as the security situation remains volatile, after last week’s brutal attacks by armed groups in Palma district, according to the UN Office for Coordination of Humanitarian Affairs:OCHA.

More than 9,100 people, almost, half of them children, arrived in Nangade, Mueda, Montepuez and Pemba districts, OCHA said in a flash update on Friday. About two-thirds of those, arriving are staying with host families, who have generously opened their homes to those fleeing the violence. “Thousands more are reportedly on the move through the forest in search of safety and are expected to arrive at different locations in the days ahead.”

According to OCHA, the attacks in Palma, which began on March 24, uprooted many, who had been sheltering there after having fled conflict in other parts of Cabo Delgado. Prior to the violence last week, nearly 670,000, including, about 160,000 women and adolescent girls, as well as, 19,000 pregnant women, were internally displaced in Cabo Delgado, Niassa and Nampula provinces, the vast majority of them living with host families, whose scarce resources are being exhausted.

UN agencies and their partners, in close co-ordination with the Government, have stepped up their support for displaced people, distributing food rations, blankets, mattresses and learning kits, as well as, providing medical and psycho-social support to those in need.

The uptick in violence in Cabo Delgado, also, severely impacted health services, endangering about 950 displaced pregnant women without access to safe delivery and lifesaving emergency obstetric care services, according to the UN Population Fund:UNFPA. There are, also, deep concerns, that thousands of women may require care in response to sexual and gender-based violence, the agency added. Protection agencies are, also, screening new arrivals to identify the most vulnerable and supporting authorities with referrals. The UN Humanitarian Air Service:UNHAS, operated by the World Food Programme:WFP continues to support the evacuation efforts, airlifting more than 380 people to safety, as of March 31. On April 01, a boat carrying 1,300 arrived in the town of Pemba, about, 280 kilometres or 175 miles south of Palma, where UN agencies and partners were present to offer assistance.

|| Humanical Perspective of Sociology ||

Imagine, a tiny village in the wide expanse of a valley of a mountain that overlooks two countries on its either side beneath almost an infinite sky hanging down with a display of wonderful skylscapes: open fields and valleys, rivers and lakes, hills and groves marking the map with nature's bounties. Through that tiny village go parallel a high way and a railway line linking the wider world to the village, stopping at the tiny railway station with white sign boards marking the station that is lamped with old Victorian lanterns. There is the station office and there is a tiny cafeteria served by a very old man of almost 90.

There is a primary school, secondary school, which feed into colleges and universities that are in the wider world, two small markets, connected to the wider market and its chain, a mosque, a temple, a church, a pagoda, a synagogue, linked and connected to the wider spheres of faiths. There are playing fields, farmlands where people are living and going about their business of life. All this is connected to this: social interactions of people, among and between them through established rules and customs and through and by organisations, institutions and structures that they have developed to support them in living life which is to be able to imagine, create and live. To be useful to others as well as oneself and one's family and community.

So the Station Master sells tickets, the Station Porter goes up and lights up those old Victorian Lanterns at dusk and puts them off when the trains stop for the day, the old man who did not have to work still gets up at three o'clock in the morning to open his cafe which his family asks him to stop doing but he does so that the people for the early dawn train would find warmth and can have a drink, the Doctor goes about seeing her patients, the chemist goes about offering medications to people, the religious persons go about doing their parts in the 'temples' mentioned, the primary and secondary school teachers go about teaching, the farmers and fishermen go about fishing, the cafes and restaurants go about serving people, the social, political and cultural spheres work on. *P-17*

To Change the World for the Better Each of Us Must Change Ourselves First: By Convincing Ourselves Why Must We Change and What That Change Must Be About and Why That Is the Change Must We Seek and Strive to Bring About: One Mind at a Time

|| Jurisprudence || US Rescinds ICC Sanctions: President Biden Should Support Global Court of Last Resort ||

It, also, created apprehension and uncertainty for non-governmental organisations, consultants and lawyers, who work with the ICC in investigative and adjudicative capacities. Several academics and practitioners, who provided expertise to the Office of the Prosecutor or represented victims before the court challenged the constitutionality of the executive order in two lawsuits in US federal court.

Several US lawmakers spoke out after the order was used to sanction the two ICC officials, as did ICC member countries, the European Union, and non-governmental organisations in the US and globally. Significantly, ICC member countries repeatedly affirmed their collective support for the court, including, during their most recent annual meeting, in December. While repealing the order, though, the Biden administration made clear it continued to oppose the ICC’s actions in the Afghanistan and Palestine situations. In response to the ICC prosecutor’s March decision to open a Palestine investigation, the US Secretary of State Mr Antony Blinken reiterated US opposition to such an inquiry, contesting the court’s jurisdiction over the situation. The prosecutor’s investigation provides a long-awaited path to justice for both Palestinian and Israeli victims of serious international crimes, Human Rights Watch said.

ICC member countries should act on the lessons of the executive order’s repeal and voice their support for the court. The countries, that created the ICC should stand ready to protect its crucial role against any action aimed at undermining its independence as a court, Human Rights Watch said. With the punitive sanctions no longer in place, the US government should review its future engagement with the ICC. A US State Department spokesperson had previously indicated that the administration might consider resuming co-operation with the court in ‘exceptional cases’. While differences will remain between Washington and the court, the Biden administration should seek regularised co-operation with the ICC. Justice through the ICC can advance important US policy interests, as the February 04 conviction of Dominic Ongwen, a former leader of the brutal Lord’s Resistance Army, demonstrated. The Ongwen case highlighted the very constructive role, that can be played by the US, which provided essential support for his surrender to the court in 2015.

While the US should work toward joining the court’s founding treaty, the Rome Statute, even, as a non-member it can advance ICC cases by providing evidence, co-operating in the arrest of fugitives, calling for and endorsing UN Security Council actions to support the court and engaging in discussions at the Assembly of States Parties, that consists of the ICC’s 123 member countries. “The ICC has its limitations but, its role as a court of last resort for the worst crimes is needed now more than ever.” Mr Dicker said. “The Biden administration should back the ICC to ensure that victims get a chance for justice and that co-operation should be the rule, not the exception.”

ℓ. Humanics In One Paragraph ℓ.

Humanity Will Continue to Live an Inferior Life Than What is Possible Until the Two Halves, Women and Men, with All Individuals in Them, are Absolutely, Fundamentally and Jubilantly Equal at Liberty. Humanity, Therefore, Is Not and Can Not Be Free Until All Humans are Equals for Only by the Yardstick of This Equality Their State of Being Free Can Be Measured. In Other Words, There Can Not Exist Liberty Unless There Exists Equality Between and Among All Humans and This State of Equality Can Not Come to Exist So Long There Remain Two Groups of Humans: The Powerful and The Powerless: Whereby the Former Controls the Later and Creates, Maintains and Carries Forward the Perpetual State of Inequality: Economically, Politically, Judicially, Constitutionally, Socially, Culturally and Spiritually. To Reach the State of Equality and Liberty, the Task Before Humanity is, Therefore, to Change This State by Taking Away Ownership and Money and, with Them, the Power They Generate and Confer, That Lets One Small Group of Humans, The Powerfals, Subjugating the Vast Multitude of Humans, The Powerless, Under Their Dictatorship. For Only by Taking Away 'the Gun' of the Power of the Powerfals, Humanity Can Bring About the State of Liberty, as Well as, Equality at Once: Equality and Liberty Can Not and Do Not Exist Separately But Together and Simultaneously. Equality and Liberty Exist as The Promethumean Fire: In Which There is the Light and There is the Heat in One Flame: The Humanion Stands Here on the Path of Humanics: A State of Liberty for All Humanity at Equality. || Humanics || Monumental Foundational and Seismic Change Does Not Ever Happen on Its Own: It Has to Be Chosen and Worked for Tirelessly With a Philosophy With a Political Philosophy With a Political Economics Offering a Vision of That Change ||

|| Monday: June 06: 2020: Munayem Mayenin || á. Most of Humanity did not, even, know that humanity was getting ready to go to the Moon, most of humanity did not, even, know who Karl Marx was, let alone the fact that, being persecuted out of his motherland Germany, he had written and published his Das Kapital in German, that will take a long while to get translated into the world languages, most did not, even, hear of Mao, let alone his Long March or the fact that the Bolsheviks were about to bring about the October Revolution in Russia nor did many know anything about the French Revolution when it happened: not many knew much about America, let alone the fact that it was fighting its War of Independence.

Not many knew that human genome had been discovered. Even, today, not many would, actually, know who Gregory Mendel was or what he did. Nor many knew that there was such a thing as computer, that had come about. It took a lone King to begin his epic work to try and seek to rectify the evils of human self-loathing or racism in America and not many in the world knew or heard of him when he was doing that vital work nor did the world get to know much about the early days when a young lawyer, named, Nelson Mandela, set out on the path of burying the self-loathing racist evils of apartheid in South Africa.

Not many of the humanity heard or, even now, know about a Katherine Johnson, who had worked out the entire mathematics of the whole trajectory of the Apollo Mission by her simple and only natural instrument, her own head. Not many heard the name, let alone, read her work, Hannah Arendt. The point is simply this: the vast majority of humanity do not begin a revolution but a tiny, tiny part of it begins that longest, hardest, most arduous, most difficult and most challenging of tasks and their courageous, visionary and revolutionary commitment, dedication, resolve and determination take the message out and onward to the wider humanity and, gradually, day by day, drop by drop, brick by brick, plank by plank, stride by stride, the course of a revolution take shape and more and more human souls join that walk and this is how human progress has always been attempted and achieved.

And, in this, never, ever, has there been a case where the established voices, platforms, agencies and organisations of many kinds either initiated or supported such progressive revolutionary endeavours. No. Not a single one of them. Not once. Yes, Regine Group of Publications are not part of any large conglomerate body nor is it owned by anyone and, we do not, surely, have much but we have taken that long path to humanics and we shall keep on going and calling on all humanity to take up the philosophy, vision, imagination and hope of humanics to see all humanity reach liberty and equality and live as all-for-one and one-for-all. Join us.

A whole range of the status-quo of all things in the manner and form of agencies and organisations with large money of this world are deeply drowned in the pigsty of capitalism, trying to profiteer and rob more and more money from the working-humanity-created worth and values to 'consume and enjoy' as much as possible of the mud of 'money's powers and prowess' while ensuring the vast majority of humanity suffer the resultant of capitalism's poverty-paradigm and all its poverty-wage, poverty-benefit, lack of any social security and all its high-cruelties, high-barbarities and high-brutalities. They are not going to lift a finger to change anything.

In fact, we can be infinitely certain that they all, as always, forever, stand against and united in opposing such revolutionary endeavours and, unite in 'investing' their wealth in seeking to stop any such revolutionary efforts or initiatives. It is up to each one of us to make a choice and go and work for such change, that we have chosen. Support Regine Humanics Foundation Ltd, a not for profit social enterprise, no one makes or takes profit out of it, not because it is fashionable and cool today but it is the future of this suffering humanity should we choose to believe that humanity is an infinity unfolding itself and we can, we should, we ought, we must change this rotten state of a hellish human condition of ever-going suffering, agony, pain and hardship for the vast majority of humanity across the earth and create an infinitely better human condition for all humanity.

Yes, they had killed Che Guevara alright when he was a revolutionary; now, they make money selling t-shirts with his image printed on them and, rucksacks, too! That is the irony of capitalism. Support Regine Humanics Foundation Ltd because humanics is the home of our future humanity as one-for-all and all-for-one. Humanics was not born yesterday or today. It was born the day the Thinker, who would spend his entire existence learning and developing it, was born, in the sixties. Humanics was developed in its entire basis, form, architecture and foundation fully in the decade of the eighties.

Humanics is not born today. But all these years, these decades it has not gone away but kept on growing and it shall keep on going and growing. Why would it? Because in capitalism humanity says, "I can not breathe", a dying, violated and extra-judicially killed, black young man's last word, that is now echoing ang raging through America, where in among those protests, one puts it so beautifully in a placard: "Capitalism = Looting."

That looting is the robbery of the worth and values of the working humanity, which is what creates, distributes and enforces poverty of all kinds in all spheres of existence in capitalism. This is why humanics is not going to do away: capitalism shall have to be discarded for the future of this dysfunctional world and the future of this suffering humanity are in humanics freeing the entire humankind into liberty and equality under the rule of law in natural justice in a humanical way of existence because in capitalism: We can not breathe. And, when we can not breathe, ought we, must we, rise to fight to live and exist as free and as equals because only there, being at liberty and in equality, can we humanity breathe, live, exist and do as humanity naturale. We can only invite for your support. Support Regine Humanics Foundation Ltd.

Reading is such a vital thing in pursuit of knowledge for without reading knowledge is rudimentary. The Humanion, we publish, for Readers to Read. The Humanion is not for anything else but for Readers to read so to be encouraged to think and ponder about things. The Humanion is a Human Enterprise, which is an idea in which no one owns anything but everyone belongs to the whole as the whole belongs to everyone lawfully and equally and, it neither believes in nor makes money but human utilities, needs, aspirations, creativity, imagination and dreams are served without money, where everyone works and creates for others as others create and work for them, thus, bringing in meaning and purpose to life along with it come natural justice, equality and liberty, that establish a true civilisation. And in one word, this system of human affairs management is called, Human Enterprise in Humanics and a society, that runs itself in humanics is called a humanical society. Humanical societies across the earth will form a grid of such similar societies, creating a humanical civilisation on earth with all humanity, all at equality and liberty, both humanity singularities and humanity pluralities are engaged in its creation, running, maintaining, advancing it without any political parties or party manipulation. Ownership is discarded with belongingship. But until Humanity has achieved the conditions to fully discard capitalism and put it in the archives of history of human development and begin to craft humanics, it must be brought under, run and managed by the rule of law and the absolute yardstick of that law must be that it must always serve the entire people of a country:nation. Capitalism can not, as it stands nor, can it be modified to do so, so long it remains a system of money to make profits, deliver 100% employment. Never can it deliver this. Thus, societies can

not 'punish' the poor and jobless people, who fill this 'basket' perpetually, for its failures and injustices, that it causes. And thus, The Humanion believes we should seek to ensure that Building-Block Foundational Human Rights are established to end all of capitalism's high-cruelties, high-brutalities and high-barbarities

Humanical Building-Block Foundational Human Rights Are

- A: Absolute Right to Live in Clean, Healthy, Safe and Natural Environment
- B: Absolute Right to Breathe Natural, Fresh, Clean and Safe Air
- C: Absolute Right to Necessary Nutritional Balanced Food and Drink
- D: Absolute Right to Free Medical Care at the Point of Need
- E: Absolute Right to an Absolute Home
- F: Absolute Right to Free Degree-Level Education and Life Long Learning
- G: Absolute Right to Guaranteed Social Care
- H: Absolute Right to a Universal Income
- I: Absolute Right to a Job
- J: Absolute Right to Dignified Civic and Human Funeral Paid Through by Universal Income

So long scenes like these, that are spread across the ruthless world, in which human souls are treated with such brutal, barbaric, cruel and absolutely dehumanised, demeaning andruthless degradation and contempt, humanity can not claim that it has learnt the 'C' of Civilisation. And the forces, groups, people and political parties, that do not see this as to how horribly, terribly, dangerously counterproductive all this is to a society and to human progress for it is like society has deliberately stabbed majority of its members with terminal blows and let them bleed, suffer in agony of pain and infection and die a lingering, slow-poisoned-death without any care being shown to them and society simply dehumanises itself so that it is able to look at all these agony, strife, pain and suffering and pretends that it does not see. But this won't be accepted by the multitude of humanity and the signs of which have been increasingly becoming more and more evident. This is not acceptable nor is supportable nor can it be left to continue to inflict miseries on humanity.

Following the collapse of the socialistic experimentation across the globe and capitalism's re-assertion and re-establishment of being 'the economic system' in the world has made this task ever more urgent and ever more vital that such a post-capitalist, post-marxist critique seeks to explain the world and the human condition, that capitalism has inflicted on world humanity so that a way forward can be crafted by the progressive forces of all humanity all over the world.

Humanics has been crafted in the philosophical, political philosophical, economical, political economical and sociological works of Author and Thinker Munayem Mayenin:

- Dehumanisation of Humanity: Four Volumes
- Humanics The Foundation: Volume One
- Humanics The Humanicsonomics: Volume Two
- Humanics The Humanicsovics The Political Philosophy of Humanics: Volume Three

Among many other major pieces of works.

There can not be any sustainability until and unless we take the view that sustainability comes as philosophical, political philosophical, political economical, ethical, moral, sociological, educational, jurisprudential, socio-cultural and ecological and humanical spiritual so that we are able to create a sustainable ‘architecture’ of existence in a clean, green, circular and sustainable political economics, that underpins all forms and expressions of sustainability and when such an ‘architecture’ exists within the Larin Paraske Maxim or Oath: Do No Harm to Anyone or Anything: all things and all living forms must have equitable status in the sphere of all existence or all life on earth, with an emphasis on the Universana. Because humanity does not just exist on earth but it does so in the Sunnara, in the Home Bay of the Milky Way Galaxy in the vast expanse of the Universe, our home Universana. Dear Reader, we are on the path of humanics, please, tell the world and world humanity that humanics has arrived on earth from ‘the without of human imagination’, learning, questioning and thoughts, gained from the eternal walks of this human soul’s eternal journey on the eternal path of eternal learning, with its humanical metaphysics, humanical philosophy as natural science, humanical psychology, humanical political philosophy, humanical political economics, humanical jurisprudence, humanical sociology, humanical moral science and humanical arealism. For capitalism has created global warming and climate change and wracked the earth with environmental degradations and pollutions in all spheres, where bio-diversity is getting lost at an alarming rate as the earth keeps on being heated up. Humanity is devastated by capitalism’s poverty-paradigm, delivering all its high-cruelties, high-brutalities and high-barbarities. This is why it is paramount that that we speak up and out and try our hardest to inspire faith, hope, determination and resolution among all humanity of this world, women and men, that we shall not just accept this ‘sentence of doom’, that capitalism’s mindless consumerism, infinite greed of infinite profiteering, decadent voguism and venomous voyeurism, orchestrated by the Distorteddia have brought us and, yet, that we can, we should, we ought, we must keep on trying: ‘to seek to try: to do: to change: to make better the human condition’ and we do so as one humanity, as women and men, working together as one, in unison with the same aim, same goal, same objective: to get all humanity to liberty, equality, fairness and justice in the rule of law in natural justice, with a purpose and meaning to our existence, where we all humanity, with our all-unity and all-diversity, exist as one humanity naturale on one Mother Earth, in one Sunnara, in one Home Bay Milky Way Galaxy in the one Universana with the humanical foundation of faith: humanity is an infinity unfolding itself, in which, we are all-for-one and one-for-all.
