**|| The World || Five UN Agencies Call Upon World Governments: For Shipping and Air Transport to Continue to Operate Safely the Safe Cross Border Movement of Seafarers and Aircrew Must Be Facilitated: Designate Seafarers and Aircrew As Key-Workers ||**

|| Saturday: March 27: 2021 || α. The International Civil Aviation Organisation:ICAO, the International Labour Organisation:ILO, the International Maritime Organisation:IMO, the International Organisation for Migration:IOM an the World Health Organisation:WHO have issued a joint statement in which the Agencies said, "The coronavirus COVID-19 pandemic has triggered devastating consequences for human life and the global economy. Maritime and air transport are two essential activities, that underpin global trade and mobility and are key to a sustainable socio-

economic recovery. More than 80% of global trade by volume is moved by maritime transport. The global economy depends on the world’s two million seafarers, who operate the global fleet of merchant ships.

Seafarers have been severely impacted by the travel restrictions, imposed during the pandemic. As of January 2021, it is estimated that some 400,000 seafarers are stranded on board commercial vessels, long past the expiry of their contracts and unable to be repatriated. A similar number of seafarers urgently need to join ships to replace them. Passenger air transport carried about 05.7 billion passengers in 2019 while airfreight represents 35% of the value of goods shipped in all modes combined. The total number of licensed aviation professionals, which include pilots, air traffic controllers and licensed maintenance technicians, was 887,000 in 2019, according to ICAO personnel statistics.

Application of stringent public health rules to air crew, including, quarantine, has resulted in hindered connectivity, operational complexity and significant cost. Maritime and air transport rely on seafarers and aircrew. They are key workers required to travel across borders at all times, which, may, result in the need for them to present proof of a COVID-19 vaccination as a condition for entry in some countries.

This is despite WHO recommendation that, at the present time, countries should not introduce requirements of proof of vaccination for international travel as a condition of entry, as there are still critical unknowns regarding the efficacy of vaccination in reducing transmission and limited availability of vaccines. For shipping and air transport to continue to operate safely, the safe cross border movement of seafarers and aircrew must be facilitated. We reiterate our call upon countries, that have not done so to designate seafarers and aircrew as key workers.

With this statement, our organisations, also, call on governments to prioritise seafarers and aircrew in their national COVID-19 vaccination programmes, together with other essential workers, in accordance with the advice from the WHO SAGE Roadmap for prioritising the use of COVID-19 vaccines in the context of limited supply published in November 2020. Seafarers and aircrew need to be protected through vaccination as soon as possible, to facilitate their safe movement across borders. We, also, call on governments to identify and prepare for the challenges of COVID-19 vaccination of seafarers and aircrew, particularly, for seafarers spending long periods of time away from their home country.

Our organisations fully support the timely development of an international harmonised framework for vaccination certificates, to facilitate international travel for seafarers and aircrew. In December 2020, WHO established a Smart Vaccination Certificate working group to ensure that digitalised versions of vaccine certificates are inter-operable and the UN Crisis Management Team for COVID-19, under the leadership of WHO, recognised that all countries should consider seafarers and aircrew, who are required to travel across borders during the pandemic, for essential allocation of vaccines.

We invite governments and other stakeholders to bring the contents of this joint statement to the attention of the competent authorities and all parties concerned.”

**|| Political Economics || Somalia: On the Right Track: Much Work Yet to Be Done: IMF Approves \$395.5 Million Funding Arrangements for Somalia ||**

|| Saturday: March 27: 2021 || α. The Executive Board of the International Monetary Fund:IMF has approved a three-year arrangements under the Extended Credit Facility:ECF and the Extended Fund Facility:EFF for Somalia in the amount of SDR292.4 million, \$395.5 million or around 179% of quota. The programme will support the Country’s implementation of its ambitious reform agenda and catalyse concessional donor financing.

This will help the Country implement its National Development Plan to build greater economic resilience, promote higher and more inclusive growth and reduce poverty. At the conclusion of the Executive Board’s discussion, Ms Kristalina Georgieva, the Managing Director and Acting Chair, said, “Somalia has reached the HIPC Decision Point, given the authorities’ sustained commitment to reform in a challenging political, security and climate environment. The second review of the staff-monitored programme, which has been endorsed as meeting the standards of upper credit tranche conditionality, has been completed.

The authorities' strong policy commitment has helped strengthen public financial management and the financial sector, improve governance, and enhance macroeconomic stability." She further went onto elaborate that the authorities' new three-year economic programme was an ambitious and appropriate response to Somalia's macro-economic challenges. Continued reform commitment, together with the necessary technical assistance, will be critical to achieve the programme's objectives, as well as, to secure higher and more inclusive growth. The authorities need to continue strengthening the co-operation between the Federal Government of Somalia and Federal Member States.

The medium-term fiscal framework under the programme, appropriately, balances the need to contain recurrent spending while channelling new resources toward Somalia's development plan. Continued efforts to strengthen fiscal federalism, enhance revenue mobilisation and build social protection mechanisms, will be important as Somalia moves forward. Swift implementation of Somalia's comprehensive public financial management law is needed, together with efforts to strengthen debt management and ensure a conservative approach to any future borrowing to minimise the risk of falling back into debt distress.

"The central bank's efforts to strengthen its organisational capacity and enhance regulation and supervision will be critical for the robust and sustainable development of the financial sector. Continued capacity building is needed to improve AML:CFT compliance and the national risk assessment should be completed as quickly as possible. Advancing reforms to promote good governance are also important." Ms Georgieva said.

Improving macro-economic statistics is important, particularly, GDP and balance of payments data. In this regard, the authorities should support the creation of the independent national statistics office and implement the macro-economic statistics action plan. The consultative process, that accompanied the drafting of the Ninth National Development Plan:NDP9 is commendable. It is important that the authorities update the underlying macro-economic policy framework and complete the costing exercise. Financial and technical support from the international community is important to support the authorities' reforms and the implementation of the NDP9.

"Somalia's request for interim assistance under the HIPC Initiative on the debt service falling due to the Fund over the next 12 months has been approved. The progress made in securing commitments from other creditors to provide debt relief in the context of the HIPC Initiative is welcome, as there is a need for equitable burden-sharing across all creditors. The coverage and content of the HIPC floating Completion Point triggers, which focus on growth, public financial management, debt management, governance, domestic revenue mobilisation, and statistics, is appropriate."

"The global COVID-19 pandemic and regional desert locust swarm pose new risks to the outlook and programme. In this regard, strong support from the international community remains critical."

Despite a challenging security, political and climate environment, Somalia has remained steadfast in implementing economic reforms. This has brought them to the Decision Point for debt relief under the Heavily Indebted Poor Country:HIPC Initiative . Economic growth and inflation have been relatively stable but, growth has been too low to, significantly, tackle widespread poverty. In 2019, real gross domestic product:GDP is estimated to have grown by 02.9%.

However, the impact of the recent desert locust swarm and the global coronavirus pandemic makes the near-term outlook less certain. Fiscal data reflects continued strong performance in 2019, with domestic revenues out-turns, out-pacing the indicative targets set in Somalia's Staff Monitored Programme:SMP. As a result, there was a small fiscal surplus at the end of the year. The current account deficit, which is, primarily, financed by grants, remained close to 12%bof GDP.

The new three-year IMF financing arrangements aim to anchor medium-term policies during the period between the HIPC Decision and Completion Points. These policies build on the 2019 Article IV recommendations and reforms underpinning Somalia's fourth SMP. Reforms will focus on a continued strengthening of public finances to meet Somalia's development needs while balancing fiscal sustainability considerations; a continued deepening of central bank capacity; efforts to improve the business environment and governance; and enhancing statistics.

The programme will guide fiscal policy via a robust medium-term fiscal framework:MTFF and balance Somalia's development priorities and fiscal sustainability. In the context of HIPC and NDP9 implementation, staff envisages a substantial increase in expenditures. The programme will, also, further mobilise domestic revenue to support self-sufficiency, provision of public services and social stability.

Nevertheless, fiscal space will remain constrained. To ensure sufficient resources are available for critical development expenditure a ceiling on expenditures on compensation and the use of goods and services has been put in place. Expenditures will continue to be capped by the overall size of the revenue envelope, with a zero limit on new debt accumulation. Additionally, the programme places critical importance on sustaining and deepening inter-governmental fiscal relations.

Deepen and broaden on-going public financing management:PFM reforms, which hinge on implementing aspects of the new PFM Act. In particular, strengthening budget preparation and execution, enhancing oversight, institutionalising recent improvements in budget processes and enhancing the quality of general government fiscal reporting.

Improve the capacity of the central bank. The programme will support the implementation of the central bank's new organisational structure and develop a medium-term vision to guide future policy priorities.

Re-inforce the supervisory framework and improve AML-CFT compliance . Further progress in strengthening regulatory and supervisory standards will contribute to continued financial stability. These efforts will include the expansion of supervision to the whole financial sector, especially the

mobile money sector. The program will support improvements in AML:CFT capacity, including, the deepening of capacity of the Financial Reporting Centre and enhancing inter-agency co-operation through the National Anti-Money Laundering Committee.

Support efforts to improve governance. The programme will support the completion of the authorities’ National Anti-Corruption Strategy and the related workplan to implement the strategy.

Support long-term growth and poverty reduction. The program will support these goals through fiscal conditionality and reforms and the complementary floating Completion Point triggers, along with other conditionality in World Bank operations, which are expected to address growth, water management, poverty, gender and improving the ease of doing business. Additionally, the programme will continue to support improvements in the production and dissemination of macro-economic statistics. Along with other technical assistance providers, staff will monitor and provide capacity development support to the authorities’ macro-economic statistics action plan.

**|| Geology || Gravity Mission Still Unearthing Hidden Secrets ||**

|| Saturday: March 27: 2021 || α. Despite the European Space Agency:ESA’s GOCE mission ending over seven years ago, scientists continue to use this remarkable satellite’s gravity data to delve deep and unearth secrets about our planet. Recent research shows how scientists have combined GOCE data with measurements, taken at the surface to generate a new model of Earth’s crust and upper mantle.

This is the first time such a model has been created this way and it is shedding new light on processes of plate tectonics, which, in turn, are related to phenomena, such as, earthquakes and volcanic eruptions. The lithosphere, which includes the planet's hard crust and the partially molten top part of the upper mantle, is fundamental to plate tectonics. Plate tectonics describes how the crust is divided into a mosaic of plates, that slide laterally over the malleable top of the upper mantle and in doing so give rise to new seafloor along mid-ocean ridges, mountains, volcanoes and earthquakes.

A better understanding of these processes relies on knowledge of differences in the lithosphere's temperature and chemical composition. Geo-physicists traditionally measure the speed at which seismic waves propagate when an earthquake occurs to determine the distribution of subsurface physical properties. The speed of seismic waves is governed, mostly, by the temperature of subsurface rocks and to a lesser extent by density.

Here, gravity data from space can add to picture because the strength of the gravity signal is related to density. In addition, data from satellites is uniform in coverage and in accuracy and satellites cover areas where ground measurements are scarce. For over four years, GOCE mapped Earth's gravity with extreme detail and accuracy. This has led to some remarkable discoveries, from deep below the surface of our planet to high up in the atmosphere and beyond.

New research, published in *Geo-physical Journal International*, describes how scientists generated a new model of the lithosphere, using the joint power of GOCE gravity data and seismological observations, combined with petrological data, which comes from the study of rocks, brought to the surface and from laboratories where the extreme pressures and temperatures of Earth's interior are replicated.

Mr Javier Fulla, from Complutense University of Madrid and the Dublin Institute for Advanced Studies, who is, also, the Co-author of the Paper, said, "Earlier global models of the crust or lithosphere suffered from limited resolution or were based on a single method or dataset. Only recently available models were able to combine multiple geo-physical data but, they were, often, only on regional scales or they were limited by how the different data are integrated.

For the first time, we've been able to create a new model, that combines global-scale multiple terrestrial and GOCE satellite datasets in a joint inversion, that describes the actual temperature and composition of mantle rocks."

Ms Jesse Reusen, from Delft University of Technology, said, "This novel model provides an image of the present-day composition and thermal structure of the upper mantle that can be used to estimate the viscosity. In fact, it has already been used to estimate the remaining post-glacial uplift or the rise of the land after the removal of weight of the ice, following the melting of the Laurentide ice sheet in Canada, improving our understanding of interactions between the cryosphere and the solid Earth. This research was published last year in the *Journal of Geophysical Research*."

The new model produced in ESA's three-D Earth study shows, for the first time, how dissimilar the sub-lithospheric mantle is beneath different oceans and provides insight as to how the morphology and spreading rates of mid-oceanic ridges may be connected with the deep chemical and thermal structure.

ESA's Mr Roger Haagmans, said, "Our GOCE mission never ceases to impress. The data it delivered during its four-year life in orbit continue to be used to understand the complexities of our planet. Here we see it shining new light on the structure of Earth deep below our feet. Even though processes are occurring deep down, they have an effect on Earth's surface, from the generation of renewed seafloor to earthquakes, so in turn, affect us all.

Moreover, this is a remarkable result from the three-D Earth project and another significant step towards the realisation of one of the main goals of our Science for Society programme: develop the most advanced reconstruction of our solid Earth from the core to the surface, and its dynamic processes."

### **What Are Building-Block Foundational Human Rights**

**Ask Your Political Leaders About Building-Block Foundational Human Rights and Ask Them About Humanics**

### **The Building-Block Foundational Human Rights**

- A: Absolute Right to Live in Clean, Healthy, Safe and Natural Environment
- B: Absolute Right to Breathe Natural, Fresh, Clean and Safe Air
- C: Absolute Right to Necessary Nutritional Balanced Food and Drink
- D: Absolute Right to Free Medical Care at the Point of Need
- E: Absolute Right to an Absolute Home
- F: Absolute Right to Free Degree-Level Education and Life Long Learning
- G: Absolute Right to Guaranteed Social Care
- H: Absolute Right to a Universal Income
- I: Absolute Right to a Job
- J: Absolute Right to Dignified Civic and Human Funeral Paid Through by Universal Income

**This Is the Body of Work, by Munayem Mayenin, That Has Brought Into Existence the Philosophy and Vision of Humanics**

**Dehumanisation of Humanity: Volume One: Published: July: 2007: 978-1-4477-1330-2**

Mayenin worked and developed the very critique of capitalism and Marxism while at university in which he had envisioned the world's future in humanics for humanity to reach and achieve liberty and equality for all humanity, which capitalism has continually slaughtered and Marxism failed desperately, even, to understand, let alone, to know or show how to seek and achieve them. Some of these works were published in publications in the early 00s and the volume was published as a book in 2007. There are three other volumes of this planned work, yet to be published.

**Humanics The Foundation: Volume One: Published: December 06: 2017: ISBN: 978-0-244-34575-4**

This piece of work elaborated the philosophy of humanics and presented the idea of human enterprise and how it works to enable humanity to conduct the human economical endeavours in humanics.

**Humanics The Humaniconomics: Volume Two: Published: June 12: 2018: ISBN: 978-0-244-48334-0**

This is the political economics or humaniconomics of humanics in human enterprise. This volume presents the political economics of humanics and envisioned world's future as two distinct phases: pre-humanical or Kapitalawnomics phase in which capitalism is saved from pseudonomics and brought under the absolute and complete control and power of the rule of law so to make it serve the people at all times and not the rich and through this phase, humanity brings into existence the humanical Building-Block Foundational Human Rights and end capitalism's Poverty Paradigm, that causes all of the high-cruelties, high-brutalities and high-barbarities, that are inflicted on the vast number of humanity on this earth. Further to this, this work advances the system and mechanism of human enterprise and envisioned at the end of the development of Kapitalawnomics human societies will have developed enough to be able and equipped to try and seek to bring into existence humanical societies, that will begin to form a grid of humanical societies into a universal humanical civilisation on earth.

**The Humanics Elleesium Declaration 2019: The Humanicsxian Manifesto: Published: April 06: 2019: ISBN: 978-0-244-76474-6**

This short piece of work nano-summarised the entire body of Munayem Mayenin's works on humanics. This calls on the working humanity of the world to rise, organise and united under new and humanical political forces, parties and organisations to seek and try to bring about a humanical world movement to lead humanity to equality and liberty.

**Humanics The Humaniconovics: Volume Three: To Be Published Later This Year**

This volume presents the political philosophy of humanics and the means to deliver that political philosophy by and through humaniconovics, humanical direct form of democracy without party politics whereby each and every individual human being becomes his:her own High

Representative and they all run their society's human affairs management together as individuals, working together as scientists and mathematicians without any political parties.

**Alphansum Sovereign Necessarius: Published April 14: 2020: ISBN: 978-0-244-58241-8**

Although, this large volume is of metaphysical work, it has brought the whole humanical universal view in a harmonious outlook, unifying all expressions, fields, areas and arenas of human existence and in this process this work envisioned the coming into existence the new branches of science, that has already been mentioned.

**Laranska The Anatomy of Fear: Novel: Published: January 2009: ISBN: 978-1-4477-1426-2**

**No Man's Land's Bloom: Play: Published: May 2010: ISBN: 978-1-4477-0903-9**

**United Colours of Blood: Screenplay: Published: January 2009: ISBN: 978-1-4477-1615-0**

**Larantia Poetry of Anatophysiophilosophicamonimayareginata: A Magnum of a Planned Volume of 850 Sonnets About All Branches of Medicine: Currently Having Few Hundred Sonnets: First Published: October 14, 2016: ISBN: 978-1-326-28882-2**

In his other major bodies of works, that are yet to be published Mayenin has worked on further in elaborating the psychology and social psychology of the zoohumanity, that capitalism and all the dehumanisations it has inflicted on humanity through its enforcement of inequality and the absence of liberty. These as yet unpublished works include: Psychology of Zoohuman, Humanical Jurisprudence, Sociology of Evil, Economics of Squalors: The High-Cruelties High-Brutalities and High-Barbarities of Capitalism, Humanical Moral Science, Social Morality Or Good State, Humanical Civilisation: A Universal Grid of Humanical Societies and Colossus Complexus: Eternally Learning Humanity.

|| Humanity Will Continue to Live an Inferior Life Than What is Possible Until the Two Halves, Women and Men, with All Individuals in Them, are Absolutely, Fundamentally and Jubilantly Equal at Liberty. Humanity, Therefore, Is Not and Can Not Be Free Until All Humans are Equals for Only by the Yardstick of This Equality Their State of Being Free Can Be Measured. In Other Words, There Can Not Exist Liberty Unless There Exists Equality Between and Among All Humans and This State of Equality Can Not Come to Exist So Long There Remain Two Groups of Humans: The Powerful and The Powerless: Whereby the Former Controls the Later and Creates, Maintains and Carries Forward the Perpetual State of Inequality: Economically, Politically, Judicially, Constitutionally, Socially, Culturally and Spiritually. To Reach the State of Equality and Liberty, the Task Before Humanity is, Therefore, to Change This State by Taking Away Ownership and Money and, with Them, the Power They Generate and Confer, That Lets One Small Group of Humans, The Powerfals, Subjugating the Vast Multitude of Humans, The Powerless, Under Their Dictatorship. For Only by Taking Away 'the Gun' of the Power of the Powerfals, Humanity Can Bring About the State of Liberty, as Well as, Equality at Once: Equality and Liberty Can Not and Do Not Exist Separately But Together and Simultaneously. Equality and Liberty Exist as The Promethumean Fire: In Which There is the Light and There is the Heat in One Flame: The Humanion Stands Here on the Path of Humanics: A State of Liberty for All Humanity at Equality. The Promethumean: Where Prometheus is Not Seen as a Man But a Human: In Short, Regine Humanics Foundation Ltd and The Humanion Stand for These and Exist and Work for the Promotion of This Vision of Humanics for a Better Human Condition for All Humanity Across the Mother Earth on the Mother Universana: We Invite You All for Your Support: Join Us in Telling the World and World Humanity That: An Infinitely Better Human Condition for All Humanity Across the Mother Earth IS Possible. || Regine Humanics Foundation Ltd ||

|| **Support Regine Humanics Foundation Ltd** ||

Regine Humanics Foundation Ltd Publishes The Humanion, The Humanion Portable Daily and The Humanion Larnaarch, among doing other things: We do not and shall not accept fundings or contributions from any type, form, manner and layer of Governments of national, international, supra-national or any other type or bodies formed by them nor from rich individuals or bodies or agencies of any kind. This, to us, is as a matter of absolute philosophic principle to ensure our resolute and complete independence.

The ways, in which, we invite support from the readers, members of the public and all other individuals and agencies and businesses of any kind, are: a: Voluntary Subscription Payments: b: Voluntary Contributions: c: The Minimal and Symbolic Membership Fees to Our Regineumanics Family: d: Buying a Copy of The Long Walk to Humanics: e: Contributing to Our Events: f: Subscribing to Our Publications and g: Advertisement in The Humanion Group of Publications.

You make a conscious, wilful and philosophic choice to Support The Regine Group of Publications and The Foundation. If, you do: thank you: If, you do not, thank you, too, for reading The Humanion and The Humanion Portable Daily.

The world has, apparently, accepted that Capitalism is the High Pinnacle of All Systems and, some still dream that Marxism will rescue humanity from this Killing Mechanism Capitalism, we refuse to subscribe to that. Humanics is the Post-Marxist and Post-Capitalistic World View of What Humanity can be and what it can do and how infinitely better a human condition can be created in a Humanical Society, by eradicating ownership and money and by establishing belongingship in human enterprise, setting all humans at liberty and equality under the rule of law in natural justice with a direct form of democracy, humanics calls it, Humanicsovics, in which, each human soul is her:his own High Representative. In this, Humanics is the Minority Vision and we do not and can not expect millions and billions of people supporting our vision today but We Whole-Heartedly Believe That ONE DAY This Humanity Shall BE ALL HUMANICAL: By When: We Know Not But This: That Being a Monstrous Killing Mechanism Capitalism IS Unsustainable: The World Shall Change One Day and Every Change Begins with an Idea, with a Vision:

We invite you to Envision the Vision and Philosophy of Humanics and Support The Humanion, The Humanion Portable Daily, The Humanion Larnaarch and The Foundation to Keep Taking Forward the Vision and Philosophy of Humanics, to Keep on Challenging Capitalism's Poverty Paradigm, for an Infinitely Better Humanity in an Infinitely Better Human Condition for All Humanity Across Mother Earth. Thank You.

**The Humanion UK Online Daily: Free Online Everyday: In Publication Since September 24: 2015**

There can not be any sustainability until and unless we take the view that sustainability comes as philosophical, political philosophical, political economical, ethical, moral, sociological, educational, jurisprudential, socio-cultural and ecological and humanical spiritual so that we are able to create a sustainable 'architecture' of existence in a clean, green, circular and sustainable political economics, that underpins all forms and expressions of sustainability and when such an 'architecture' exists within the Larin Paraske Maxim or Oath: Do No Harm to Anyone or Anything: all things and all living forms must have equitable status in the sphere of all existence or all life on earth, with an emphasis on the Universana. Because humanity does not just exist on earth but it does so in the Sunnara, in the Home Bay of the Milky Way Galaxy in the vast expanse of the

Universe, our home Universana. Dear Reader, we are on the path of humanics, please, tell the world and world humanity that humanics has arrived on earth from ‘the without of human imagination’, learning, questioning and thoughts, gained from the eternal walks of this human soul’s eternal journey on the eternal path of eternal learning, with its humanical metaphysics, humanical philosophy as natural science, humanical psychology, humanical political philosophy, humanical political economics, humanical jurisprudence, humanical sociology, humanical moral science and humanical arealism. For capitalism has created global warming and climate change and wracked the earth with environmental degradations and pollutions in all spheres, where bio-diversity is getting lost at an alarming rate as the earth keeps on being heated up. Humanity is devastated by capitalism’s poverty-paradigm, delivering all its high-cruelties, high-brutalities and high-barbarities. This is why it is paramount that that we speak up and out and try our hardest to inspire faith, hope, determination and resolution among all humanity of this world, women and men, that we shall not just accept this ‘sentence of doom’, that capitalism’s mindless consumerism, infinite greed of infinite profiteering, decadent vogueism and venomous voyeurism, orchestrated by the Distorteddia have brought us and, yet, that we can, we should, we ought, we must keep on trying: ‘to seek to try: to do: to change: to make better the human condition’ and we do so as one humanity, as women and men, working together as one, in unison with the same aim, same goal, same objective: to get all humanity to liberty, equality, fairness and justice in the rule of law in natural justice, with a purpose and meaning to our existence, where we all humanity, with our all-unity and all-diversity, exist as one humanity naturale on one Mother Earth, in one Sunnara, in one Home Bay Milky Way Galaxy in the one Universana with the humanical foundation of faith: humanity is an infinity unfolding itself, in which, we are all-for-one and one-for-all.
